Audit Report - Devi Fisheries Limited II
Seafood Processing Standard Issue 5.1

Basic Facility and Audit Information

Pillar	Reference	Conforming
Food Safety	1.1	Yes
Clause and Explanation		

Clause:
The facility shall demonstrate that they are entitled to process and produce seafood at the site applied for.

Explanation:
M/s. Devi Fisheries Limited II has all documents that are current and valid to comply with local and national regulations that include land use, water use, factory construction and operation, legal rights to export seafood and reflects environmental compliance. The original documents are with the administration department with copy of each document with Manager QA. The above said and all other related documents reviewed were cited below in this section.

Pillar	Reference	Conforming
Food Safety	1.2.1	Yes
Clause and Explanation		

Clause:
Documents are available to prove legal land and water use by the facility.

Explanation:
The Land purchase sale deed No. 494/2018 dated 23-01-2018 covering the land under Survey no. 50/1 for 1.88 cents and 48/4 for 0.09 cents is available for total area of the facility Ac. 1.97 cents belongs to Mr. Yarlagadda Veerraju, Executive Director in M/s. Devi Fisheries Limited for an area of 7972.307 Sq meter of land and buildings of 2021.86 sq.m of production and 391.11 square meter, storage areas for a total of 2,412.97 Square meters. House Tax Assessment No.883 paid vide Receipt No.390, Rs.88,515.00 Dt.2023-11-15. Electricity bill paid against HT SC No: RJY270, they paid an amount of Rs. 25,93,466.00 Payment receipt No.420/338774 on Dt.2024-08-14.

Pillar	Reference	Conforming
Food Safety	1.2.2	Yes
Clause and Explanation		

Clause:
Documents are available to prove all business and operating licenses have been acquired by the facility.

Explanation:
The company has business and operating licenses in place and current. The following document was reviewed during the audit.
Export Inspection Council registration was with approval No: 857 Dt: 2023-06-27 Valid till 2026-02-16 issued by the

Export Inspection Council of India is evident.
Marine Product Export Development Authority registration was evident details of certificate as follows
Certificate of registration as an exporters: AP1/MT/0370/04 Dt:2004-12-21 Valid till 2025-12-12.
Processing plants: AP6/PP/002/15 Dt:2024-02-15 Valid till 2026-02-16. (Capacity 48 MT)
Storage premises: AP6/SP/002/15 Dt:2024-02-15 Valid till 2026-02-16 (Capacity 729 MT)
Peeling shed: AP6/PC/002/15 Dt:2024-02-15 Valid till 2026-02-16.
All the above certificates were issued by Marine Product Exports Development Authority of India.
License from dept. of factories – License no: 42509, Registration No: 3695 Dt.2024-05-21 and it is valid until duly canceled. Last challan No.61316221802022 paid on 2023-12-21 for Rs.81,000/- for factory license renewal fee for the year 2023.
USFDA certificate of Registration: 12209393556, Valid till 2024-12-31.
FSSAI License - 10018044001428 Dt: 2023-11-01 and valid till Dt. 2024-11-28.

Pillar	Reference	Conforming
Food Safety	1.2.3	Yes
Clause and Explanation		

Clause:
Documents are available to prove compliance with applicable environmental regulations for construction and operation.

Explanation:
The consent of Authorization from the Andhra Pradesh Pollution Control Board is evident for operation of effluent treatment plant. Consent order No: 5041/APPCB/ZO-VSP/KKD/CFO/2020 Dt.2020-12-02 valid till 2030-12-31. Facility is eligible to discharge 20,000 Liters per Day of treated effluent including Domestic Effluent. Consent order stating that after treatment in the ETP, the treated waste water shall be used for green belt development within the industry's premises. Facility using their discharged water for agriculture crop for the land of 2 acres 48 cents present adjacent to the facility and same has been confirmed during facility inspection. The more information regarding processing waste and lubricant disposal and permitting is presented in Clauses 4.2.2 and 4.2.3.

Pillar	Reference	Conforming
Food Safety	1.2.4	Yes
Clause and Explanation		

Clause:
Documents are available to prove that the facility is aware of, keeps up-to-date, and complies with, all relevant legislation of both the country they produce seafood in, the countries they export to, and source countries if applicable. This includes all food safety regulations.

Explanation:
The company has a system in place to ensure updation of all licenses and approvals and also to keep up with the legislation. Various documents which include regulations, legislation, guidelines, scientific information etc. are evident on file. The Senior Manager QA is responsible for this activity.
The Manager QA is responsible for collection of information pertaining to legislation of the country where products are produced and information pertaining to country of export and updating the same to various plant personnel. They also get information about the industry from the Seafood Exporters Association of India (SEAI) that they are members of.
A list of documents and reference books evident on file. Recent communication was through journals (MPEDA Newsletter, FDA and EIC updates) and mails, communication from Export Inspection Agency and Marine Products Export Development Authority. Recent communication from The Marine Products Export Development Authority, Kochi, Dt. 2024-08-12 regarding Muddy and moldy/mustry smell in aquaculture shrimp - Reg .

Pillar	Reference	Conforming
Food Safety	2.1.1	Yes
Clause and Explanation		

Clause:
The facility shall have an appropriate Quality Management System that is documented, authorized by senior management, effectively implemented, maintained and continually improved.

Explanation:
Quality & Food safety Management systems Manual (Issue 07, Rev 00, 2024-06-01) is developed as per BAP. Food Safety Manual is addressing all the clauses adequately. The manual is reviewed annually and whenever need arises. Quality & Food safety Manual is authorized by Managing Director. Quality & Food safety Manual is well documented, implemented and continually improved in line with adopted standards and (BAP & BRCGS) to incorporate standard requirements whenever they get revised.

Pillar	Reference	Conforming
Food Safety	2.1.2	Yes
Clause and Explanation		

Clause:
The QMS shall be reviewed and updated as often as necessary, especially after a food safety incident or product recall, with a minimum frequency of annually.

Explanation:
Quality Systems Manual is reviewed as a minimum once in a year as part of Management review meeting, same is documented under Senior management commitment and continual improvement (Doc No. FSQMS/17 I07 R00 Dt.2024-06-01). It is also reviewed in line with adopted standards and (BAP & BRCGS) to incorporate standard requirements whenever they get revised.

Pillar	Reference	Conforming
Food Safety	2.1.3	Yes
Clause and Explanation		

Clause:
Facilities shall have a copy of the current Seafood Processing Standard on site. Copies may be a printed or electronic version.

Explanation:
The facility having a Seafood Processing Standard (SPS) – Issue 5.1 – 16 – November – 2020 in the form of both hard copy and electronic version also.

Pillar	Reference	Conforming
Food Safety	2.1.4	Yes
Clause and Explanation		

Clause:
The Quality Management System shall include a clear Food Safety Management System based on HACCP. (This can either be part of the QMS or a separate document).

Explanation:
Plant has an HACCP based food safety management system described in Normative reference (Doc No.FSQMS/06 I07 R00 Dt.2024-06-01) and also draws reference to HACCP of Integrated Quality Management System and Food Safety Management System.

Pillar	Reference	Conforming
Food Safety	2.1.5.1	Yes
Clause and Explanation		

Clause:
Identify the processes for the quality and food safety management systems.

Explanation:
The processes for the quality and food safety management system described in the Sequence and Interaction of the Process (Doc No.FSQMS/21 I07 R00 Dt.2024-06-01).

Pillar	Reference	Conforming
Food Safety	2.1.5.2	Yes
Clause and Explanation		

Clause:
Determine the sequence and interaction of these processes.

Explanation:
The company has identified the processes required for effective control and implementation of a Food Safety and Quality Management System. Documented in Sequence and Interaction of the Process (Doc No.FSQMS/21 I07 R00 Dt.2024-06-01).

Pillar	Reference	Conforming
Food Safety	2.1.5.3	Yes
Clause and Explanation		

Clause:
Determine criteria and methods required to ensure the effective operation and control of these processes.

Explanation:
Effective operation and control of these process are achieved by building and maintaining infrastructure, machinery and processing operations. They also built a team of talented, educated, trained workers and staff for speedy processing operations & Quality control. Organizational requirements, customer requirements & feedback and regulatory requirements are categorized under input criteria, Food safety and quality manual, HACCP plan, Documented procedures, process approach and standards & reviews are categorized under processes (methods) and output criteria is defined as organization effectiveness and efficiency in achieving its objectives Doc No. FSQMS/13 I07 R00 Dt.2024-06-01. The company has identified the processes required for effective control and implementation of a Food Safety and Quality Management System. Documented in Sequence and Interaction of the Process (Doc No.FSQMS/21 I07 R00 Dt.2024-06-01).

Pillar	Reference	Conforming
Food Safety	2.1.5.4	Yes
Clause and Explanation		

Clause:
Ensure the availability of information necessary to support the operation and monitoring of these processes.

Explanation:
As defined in Sequence and Interaction of the Process (Doc No.FSQMS/21 I07 R00 Dt.2024-06-01). this is achieved by ensuring availability of requisite manpower & financial resources for normal operations of the factory with flow of information and data percolating vertically & Horizontally amongst the staff and workers.

Pillar	Reference	Conforming
Food Safety	2.1.5.5	Yes
Clause and Explanation		

Clause:
Implement action necessary to achieve planned results and continual improvement.

Explanation:
As described in Sequence and Interaction of the Process (Doc No.FSQMS/21 I07 R00 Dt.2024-06-01) facility implements actions necessary to achieve planned results and continual improvement of process by taking proper CAPA at all levels in the organisation and in every process based on factual data. Also by ensuring supporting services like training of all staff & workers, quality assurance of the product, preventive maintenance of building, plant and machinery.

Pillar	Reference	Conforming
Food Safety	2.2.1	Yes
Clause and Explanation		

Clause:
The facility shall have an appropriate Quality Manual which incorporates Food Safety that is readily available to all personnel involved in quality management. The Quality Manual shall include controls that address all requirements of the SPS Standard, including the Annexes. Copies may be a printed or electronic version.

Explanation:
The manual is reviewed annually and whenever a need arises. QMS is authorized by Managing Director. QMS manual is addressing all the clauses adequately. The quality manual readily available to all personnel involved in quality management. The distribution list documented in Distribution (Doc No.FSQMS/2 I07 R00 Dt.2024-06-01).

Pillar	Reference	Conforming
Food Safety	2.2.2	Yes
Clause and Explanation		

Clause:
The Quality Manual shall include the products to be processed. The Quality Manual shall also include documented procedures or specific reference to them.

Explanation:
The plant has an HACCP based food safety management system described in HACCP manual. Range of different products processed and procedures were described in Quality Systems Manual and a clear reference has been drawn to the procedures like SOP's, SSOP's & GMP's. It also describes the interaction of the processes.

Pillar	Reference	Conforming
Food Safety	2.2.3	Yes
Clause and Explanation		

Clause:
The Quality Manual shall clearly define all of the quality attributes for all raw material received, and finished products produced, that shall be monitored and controlled to ensure conformance to legal requirements and customer and facility specifications.

Explanation:
The Quality Manual Clearly defines all the Quality Attributes in line with Legal Requirements of Different Importing Countries and Customer & product specifications documented in Product Realization (Doc No.FSQMS/19 I07 R00 Dt.2024-06-01).

Pillar	Reference	Conforming
Food Safety	2.2.4	Yes
Clause and Explanation		

Clause:

The Quality Manual shall define the attributes cited in 2.2.3 to include, at a minimum, conformance requirements for: labelling, net weight, size, proper sensory attributes, color, and all appropriate defects such as presence of shell fragments, bones, skin, bruising, trimming defects, canning seam defects, container and closure defects, semi-rigid and flexible container damages, and any other appropriate parameters.

Explanation:
Quality Attributes related to labelling, net weight, size, proper sensory attributes colour and all appropriate defects is described in Product Realization (Doc No.FSQMS/19 I07 R00 Dt.2024-06-01) net weight size, proper sensory attributes.

Pillar	Reference	Conforming
Food Safety	2.2.5	Yes
Clause and Explanation		

Clause:
The Quality Manual shall define the sampling size, testing frequency, procedures, maximum or minimum tolerance levels, corrective action, responsible personnel, and recordkeeping requirements associated with all of the quality management procedures.

Explanation:
The quality manual is addressing sampling size, testing frequency, procedures, maximum or minimum tolerance level, corrective action, responsible personnel and record keeping requirements Product Realization (Doc No.FSQMS/19 I07 R00 Dt.2024-06-01), sampling size, testing frequency, procedures, maximum or minimum tolerance levels, corrective action, responsible personnel, and record keeping requirements.

Pillar	Reference	Conforming
Food Safety	2.3.1	Yes
Clause and Explanation		

Clause:
As part of the Quality Manual, the facility shall have a clearly defined, documented Quality Management System Policy statement, authorized by senior management, that reflects its commitment to the entire scope of the SPS Standard, including the Annexes.

Explanation:
A documented Food Safety and Quality Policy (Doc No. FSQMS/12 I07 R00 Dt.2024-06-01) and the policy addressing all the requirements as per the BAP requirement. The quality policy is signed by Managing Director.

Pillar	Reference	Conforming
Food Safety	2.3.2	Yes
Clause and Explanation		

Clause:

The facility shall define, document, and ensure that food safety and quality objectives are monitored with measurable outcomes.

Explanation:
The food safety quality objectives are documented in Food safety and quality objectives (Doc No. FSQMS/13 I07 R00 Dt.2024-06-01). The food safety quality objectives are monitored quarterly basis reviewed Quality Objectives Record (FMT/SOP/100) Dt. 2024-09-08 for the period Jun to Aug 2024.

Pillar	Reference	Conforming
Food Safety	2.4.1	Yes
Clause and Explanation		

Clause:
The facility shall have an organizational chart that reflects the current plant management and, at a minimum, those employees and their back-up personnel responsible for compliance with quality assurance, legality, and food safety requirements.

Explanation:
The organizational structure was placed in Organization Chart (Doc No. HACCP/07 I01 R00 Dt.2024-02-16 page No.15) authorized by Managing Director is in place. All the reporting relationships of the personnel key to the product safety and legality, back up personnel responsible were described in Responsibility, Authority and communication (Doc No. FSQMS/15 I07 R00 Dt.2024-06-01).

Pillar	Reference	Conforming
Food Safety	2.4.2	Yes
Clause and Explanation		

Clause:
The facility shall also define and document job functions, responsibilities and reporting relationships of at least those employees whose activities affect product quality, legality and food safety.

Explanation:
Job responsibilities were documented in Responsibility, Authority and communication (Doc No. FSQMS/15 I07 R00 Dt.2024-06-01) and agreed by all the key staff members those are responsible for product safety . The accepted job responsibilities documented in Job description, responsibilities (FMT/SOP/115) . The Job responsibility belongs to the QA Manager Dt. 2024-06-01.

Pillar	Reference	Conforming
Food Safety	2.4.3	Yes
Clause and Explanation		

Clause:

The facility shall clearly identify the Staff Member accountable for the maintenance of the Quality Management System and for the company meeting and adhering to all of the requirements of the Seafood Processing Standard.

Explanation:
The company's management has identified the Plant Manager as the responsible and accountable person for management & maintenance of the BAP letter Dt. 2024-01-01 signed by the Managing Director.

Pillar	Reference	Conforming
Food Safety	2.4.4	Yes
Clause and Explanation		

Clause:
The facility shall identify the membership and competency of the HACCP Team. Competency shall be demonstrated through documented evidence of HACCP training.

Explanation:
HACCP team formed is multidisciplinary documented in HACCP Team (Doc No. HACCP/07 I07 R00 Dt.2024-06-01) and it includes, Managing Director, General Manager, Plant Manager, QA Manager, Production In-charge, Technologist (Production), Sanitation In-charge, Machinery In-charge, Purchase Manager, Cold store In-charge, Vehicle In-charge. The Plant Manager is identified as HACCP team leader and he demonstrates clear leadership by conducting HACCP trainings to team and HACCP reviews. Competency is ensured by proper education qualification, training, experience & job scope and responsibility. HACCP team leader attended an external training conducted by Marine Products Export Development Authority on Seafood HACCP training from 27 to 30 Oct 1998 Seafood HACCP Training Course conducted by The Marine Products Export Development Authority. All other team members were trained internally by Plant Manager on Dt.2024-04-28 and QA Manager on Dt. 2024-08-25. Reviewed QA Manager HACCP training on Seafood HACCP conducted on 12 to 15 March 2012 conducted by The Marine Products Export Development Authority.

Pillar	Reference	Conforming
Food Safety	2.4.5	N/A
Clause and Explanation		

Clause:
Facilities that produce shelf-stable acidified foods and low-acid canned foods in hermetically sealed containers, i.e. canning, retorts, aseptic processing and product formulating systems (including systems wherein water activity is used in conjunction with thermal processing) shall demonstrate their compliance with the regulations to control these processes. (Note: For facilities operating in the USA, guidance can be found at:

Explanation:
Not applicable as the facility not produce shelf stable acidified foods and low-acid canned foods in hermetically sealed containers.

Pillar	Reference	Conforming
Food Safety	2.4.6	N/A

Clause and Explanation

Clause:
Operators of the processing systems detailed in 2.4.5 (including container closure inspectors) shall be under the supervision of a person who has satisfactorily completed the prescribed course of instruction approved by the US FDA (or equivalent) for giving instruction appropriate to the preservation technology involved.

Explanation:
Not applicable. Refer clause No.2.4.5.

Pillar	Reference	Conforming
Food Safety	2.5.1	Yes
Clause and Explanation		

Clause:
The facility's senior management shall demonstrate their commitment to the development, implementation, and continuous improvement of all elements of the Quality Management System in order to ensure compliance with the entire scope of the Seafood Processing Standard (including Annexes).

Explanation:
Presence of Managing Director during bi annual Management Review Meeting and reviewing the results of internal and external audits in management review meetings. Managing Director was present at the opening and closing meetings of all the audits. Senior Management has committed to improvement and implementation of QMS like BAP etc. and certifications were achieved and maintained. Management Review Meeting (FMT/SOP/076) Dt. 2024-09-10 was seen and it includes the requirements of BAP standard including annexures.

Pillar	Reference	Conforming
Food Safety	2.6.1	Yes
Clause and Explanation		

Clause:
The facility's senior management shall determine and provide, in a timely manner, all the resources needed to implement and improve the processes of the QMS and to address customer satisfaction.

Explanation:
All necessary resources like finance, adequate manpower, infrastructure etc. to implement and maintain the Food safety management and quality management were provided by the management. Resource management is reviewed in during Management review meeting once in a year by senior management and necessary corrective actions were taken. Customer complaints and customer satisfaction index was also reviewed by senior management during MRM’s once in a year.

Pillar	Reference	Conforming
Food Safety	2.7.1	Yes

Clause and Explanation

Clause:
The facility's senior management shall be involved in the QMS review of all plans, procedures and systems necessary for compliance with the full scope of the Seafood Processing Standard (including its Annexes).

Explanation:
Management Review Meeting (FMT/SOP/076) Dt. 2024-09-10 is seen and it include the details as per the scope of the BAP standard.

Pillar	Reference	Conforming
Food Safety	2.7.2	Yes
Clause and Explanation		

Clause:
Management reviews shall occur at planned intervals and at a minimum annually. These reviews shall ensure the plans, procedures and systems are up-to date and continue to be effective.

Explanation:
Management review meeting is conducted once in a year and last conducted on Dt. 2024-09-10 and 2023-09-11.

Pillar	Reference	Conforming
Food Safety	2.7.3	Yes
Clause and Explanation		

Clause:
Minutes of the management review meeting shall be maintained and available for review. The minutes shall include, at a minimum: attendees, agenda items, key decisions, and follow up actions with time scales and accountabilities. Follow up actions shall be closed out in a timely manner and the results shall be documented.

Explanation:
The Minutes of Management review meeting documented in Management Review Meeting (FMT/SOP/076) Dt. 2024-09-10 were seen and the minutes include attendees, agenda items, key decisions and followup actions with time scales and accountability.

Pillar	Reference	Conforming
Food Safety	2.8.1	Yes
Clause and Explanation		

Clause:
The facility shall document all items purchased that impact food safety, regulatory requirements and quality. The

purchasing process shall be controlled to ensure these items conform to requirements. (Examples of items include but not limited to raw material, finished product, packaging, additives and ingredients.)

Explanation:
Purchasing procedure is documented in Selection, assessment and evaluation of suppliers (Doc No. SOP/37 I07 R00 Dt.2024-06-01) it includes raw material, packaging material and ingredients. The procedures were well implemented and maintained.

Pillar	Reference	Conforming
Food Safety	2.8.1.1	N/A
Clause and Explanation		

Clause:
A procedure shall be in place to identify and control all hazards associated with receiving/accepting/purchasing of wild harvested raw materials from private independent harvesters.

Explanation:
The facility is not producing wild-caught product.

Pillar	Reference	Conforming
Food Safety	2.8.1.2	N/A
Clause and Explanation		

Clause:
Determination for acceptance shall be based on, but not limited to, HACCP criteria as indicated for source control.

Explanation:
The facility is not producing wild-caught product.

Pillar	Reference	Conforming
Food Safety	2.8.1.3	N/A
Clause and Explanation		

Clause:
All raw materials acquired from wild harvest sources shall be in full compliance with local, tribal, state, federal, or international harvesting regulations and shall not be from RFMO (Regional Fisheries Management Organizations) Combined IUU Vessel List.

Explanation:
The facility is not producing wild-caught product.

Pillar	Reference	Conforming
Food Safety	2.8.2	Yes
Clause and Explanation		

Clause:
The facility shall demonstrate control as noted in 2.8.1 through, at a minimum: the appointment of designated purchasing personnel and written purchasing procedures. (See also 2.10 - "Supplier Approval and Performance Monitoring").

Explanation:
The purchase procedure was documented in Selection, assessment and evaluation of suppliers (Doc No. SOP/37 I07 R00 Dt.2024-06-01). The designated purchase personnel are Purchase Manager/QA Manager.

Pillar	Reference	Conforming
Food Safety	2.8.3	Yes
Clause and Explanation		

Clause:
The facility shall also develop and maintain written specifications that include, at minimum, food safety, legality and quality for the items stated in clause 2.8.1.

Explanation:
Specifications for Raw material, ingredient and packaging were documented in Company purchase specifications (Doc No.SOP/39 I07 R00 Dt.2024-06-01) is developed to address the requirements of specifications, developing of specifications and review of specifications.

Pillar	Reference	Conforming
Food Safety	2.8.4	Yes
Clause and Explanation		

Clause:
The specifications shall be agreed to between the facility and their suppliers, and shall be signed, dated and authorized by appropriate parties.

Explanation:
All the specifications were sent to suppliers and were agreed by the suppliers before supplying the materials to the facility. Finished product specifications were agreed with customers. Reviewed Raw material specification agreed by RVR Chinna Rao Farms, Reg.No.AP025238, Ponnada Village, U.Kothapalli Mandal, East Godavari District, Dt.2024-03-05 the speficiations reviewed annually. Packaging material specifications agreed by M/s. Pragati Print Pack, Visakhapatnam Dt.2023-07-22 valid till Dt.2025-07-21 and Ingredients specifications agreed by Prayon S.A, (For Phosphate) Dt.2023-07-22 valid till Dt.2025-07-21.

Pillar	Reference	Conforming
Food Safety	2.8.5	Yes
Clause and Explanation		

Clause:
Specifications shall be kept up-to-date and periodically reviewed, which shall occur at a minimum, annually.

Explanation:
The specifications available in the facility are up to date and last reviewed on Dt.2024-06-01. The specifications are reviewed once per calendar year.

Pillar	Reference	Conforming
Food Safety	2.8.6	Yes
Clause and Explanation		

Clause:
Specifications shall be readily available for reference by designated personnel.

Explanation:
The specifications are readily available with QA Manager.

Pillar	Reference	Conforming
Food Safety	2.9.1	N/A
Clause and Explanation		

Clause:
The facility shall exercise proper control over any entity that is used to outsource any processes that may have an impact on food safety, legality, quality, traceability and social responsibility. (See Annex 3 regarding traceability and the BAP star status.

Explanation:
The facility is not outsourcing any processes.

Pillar	Reference	Conforming
Food Safety	2.9.2	N/A
Clause and Explanation		

Clause:

The facility shall demonstrate control over any outsourced processing service. Control measures shall include but are not limited to: audits to full scope of SPS by the facility or third-party certification to SPS, laboratory testing of outsourced products, and traceability of outsourced products.

Explanation:
The facility is not outsourcing any processes.

Pillar	Reference	Conforming
Food Safety	2.9.3	N/A
Clause and Explanation		

Clause:
The control measures over such outsourced processes shall be identified, documented and monitored to ensure compliance with the full scope of the SPS standard, including its Annexes.

Explanation:
The facility is not outsourcing any processes.

Pillar	Reference	Conforming
Food Safety	2.9.4	N/A
Clause and Explanation		

Clause:
There shall be a policy statement AGAINST allowing the temporary use of unapproved outsourcing service provider.

Explanation:
The facility is not outsourcing any processes.

Pillar	Reference	Conforming
Food Safety	2.9.5	Yes
Clause and Explanation		

Clause:
The facility shall not outsource the peeling and de-heading of shrimp to informal entities known as “peeling or de-heading sheds”. To be eligible for SPS certification, peeling and/or de-heading of shrimp shall only occur in establishments with valid government approvals and with legal, food safety, environmental and social criteria in place which shall be subject to audits as stated in 2.9.2. Such establishments are either,
i) owned by the applicant facility or;
ii) completely controlled by the applicant facility with valid agreements in place or,
iii) must be located onsite or in close proximity to the applicant facility and included as part of the scope of the annual SPS audit.
(Note: This prohibition cited above does not include processed shrimp that are sourced from a legally approved

processing plant subject to controls in clause 2.10.1 or shrimp originating from fishing vessels in compliances with clause 2.8.1.3).
(Note: Peeling or de-heading sheds are defined as independent, third-party "satellite" seasonal operation that engage in peeling or heading of shrimp, often temporarily, during peak harvest times without formal government approval and lack of controls on legal, food safety, evironmental and social processes.)

Explanation:
The facility not outsourcing shrimp from peeling or de-heading sheds.

Pillar	Reference	Conforming
Food Safety	2.9.6	N/A
Clause and Explanation		

Clause:
The facility shall appoint a designated management person or persons with the authority to approve and/or disapprove outsourced processing activities and each associated service provider.

Explanation:
The facility is not outsourcing any processes.

Pillar	Reference	Conforming
Food Safety	2.9.7	N/A
Clause and Explanation		

Clause:
The facility shall keep an up-to-date list of all entities they are outsourcing processes to, and the specific activity that is outsourced to each.

Explanation:
The facility is not outsourcing any processes.

Pillar	Reference	Conforming
Food Safety	2.9.8	N/A
Clause and Explanation		

Clause:
Specifications for outsourced processes as described in 2.9 shall be developed by the facility and included as part of a signed contract or service agreement between the facility and the provider. These specifications shall include compliance criteria associated with food safety, quality, legality, traceability and social responsibility. (See also 2.10 - "Supplier Approval and Performance Monitoring").

Explanation:

The facility is not outsourcing any processes.

Pillar	Reference	Conforming
Food Safety	2.9.9	N/A
Clause and Explanation		

Clause:
Specifications shall be kept up-to-date and periodically reviewed (which shall occur at a minimum, annually).
Specifications shall be readily available for reference by designated personnel.

Explanation:
The facility is not outsourcing any processes.

Pillar	Reference	Conforming
Food Safety	2.10.1	Yes
Clause and Explanation		

Clause:
The facility shall exercise proper control over any outsourced supplier or service that may have an impact on food safety, legality, quality, traceability and social responsibility. There shall be a policy statement that normally disallows the use of unapproved outsourced supplier or service provider.
Examples of commonly used services include, but are not limited to:
* Pest control
* Cleaning services
* Waste removal
* Laboratory testing
* Product storage/frozen warehousing
* Payroll and recruiting services
* Raw material transfer/delivery services (i.e. tender vessels, shipping courier)
* Laundry services (for personal protection clothing such as aprons, smocks, rain gear, gloves, etc.)
* Catering services
* Calibration services
* Equipment maintenance and repair

Explanation:
The facility is outsourcing some services like Pest Control, Waste removal, Laboratory testing, Catering Services, Finished Product transportation, calibration services and Equipment maintenance the approvals of supplier of out sourced services documented in Out Sourcing (Doc No. FSQMS/07 I07 R00 Dt.2024-06-01 page No.3) and it is detailing about the controls the facility has on suppliers of services. Contract with all the suppliers of service were on file. For pest control contract with Innovative Pest Control - agreement Dt.2024-08-01 valid till Dt.2025-07-31, for product waste generated from the process having a contract with M/s. Balaji aqua and poultry feed LLP., Samisragudem village, Nidadavolu Mandal, West godavari district Dt.2024-08-01 valid till 2025-07-31 Pollution control board consent order No.1206-APPCB/ROELR/CFO/2020 Dt.2020-03-21 valid till Dt.2030-02-28, Waste Oil taken by M/s. SAF Petroleum, Sarpavaram, Kakinada Dt.2024-08-01 valid till 2025-07-31 consent order No.5916/APPCB/ZOVSP/KKD/CFO/2018-309 Dt.2018-05-31 valid till Dt.2028-05-31, M/s. Sri Manikanta Traders, Peddapuram Dt.2024-08-01 valid till 2025-07-31, Pollution control board consent order No.CFE-14-0/APPCB/RO/KKD/2022-867 Dt.2022-09-01 valid till Dt.2029-08-31 laboratory testing done with SMS Labs Services Private Limited, NABL certificates Certificate No. TC-6118 issue Dt.2024-09-07 valid till 2026-09-06 and Vimta Labs Ltd., Visakhapatnam, NABL certificate No.TC-5374 Dt.2022-03-27 valid till Dt. 2024-03-26, finished product transportation, contract with Merlyn Shipping Transports, Visakhapatnam Dt. 2023-01-01 valid till Dt.2023-12-31, the equipment calibration done with Rasci Instruments, Chennai NABL certificate No. CC-2823 Dt.2023-10-08 valid till Dt.2025-10-07.

Pillar	Reference	Conforming
Food Safety	2.10.2	Yes
Clause and Explanation		

Clause:
The facility shall have a supplier approval program which includes a list of approved suppliers and service providers as described in 2.9 above. This list shall be kept up-to-date and reviewed, at a minimum, annually.

Explanation:
The procedure for out sourced services was defined in Out Sourcing (Doc No. FSQMS/07 I07 R00 Dt.2024-06-01 page No.3). The list of suppliers of services documented in Outsourcing details (Doc No.SOP/40 I07 R00 Dt.2024-06-01).

Pillar	Reference	Conforming
Food Safety	2.10.3	No - Minor
Clause and Explanation		

Clause:
The supplier approval program shall include all suppliers described under 2.10.1. The program shall also include criteria for approval, and the facility''s policy and/or procedure for temporary use of unapproved suppliers.
Examples of criteria for approval:
* Suppliers must have traceability systems in place to allow trace-backs to vessel or wholesaler for wild-caught or individual farm for farmed species. (See Traceability, section 9.0)
* Certification information (where applicable)
* Certificate of analysis (for certain ingredients or additives)
* Regulatory Authority Audits
* Visual assessment (packaging materials)
* Supplier audit, either by plant personnel or third-party
* Risk assessment - especially for species with potential toxicity or allergen issues, histamine, molluscan shellfish, chemical contamination, etc.

Explanation:
The procedure for approving service suppliers is documented in the Outsourcing (Doc No. FSQMS/07 I07 R00 Dt.2024-06-01, page No.3). However, it does not address the procedure for the temporary use of unapproved suppliers.

Pillar	Reference	Conforming
Food Safety	2.10.4	Yes
Clause and Explanation		

Clause:
The facility shall have in place a procedure for regularly monitoring the performance of the suppliers including those described in 2.8 and 2.9. This monitoring shall be effective and occur annually, at a minimum. Acceptable performance

criteria shall be defined as well as actions to be taken where performance does not meet criteria. The results of the performance assessments and follow-up actions shall be recorded.

Explanation:
The facility having a procedure to monitoring of performance for raw material documented in Supplier performance review (FMT/SOP/05A) Dt.2024-03-06 and for outsourced services supplier evaluation for shell waste documented in Supplier performance review (FMT/SOP/05A) Dt.2024-03-20 for Shell waste, Supplier performance review (Rec No. 73B) Dt.2024-08-01 for Pest Control. All the raw material suppliers and suppliers of services are evaluated on annual basis. The performance monitoring records were made available.

Pillar	Reference	Conforming
Food Safety	2.11.1	Yes
Clause and Explanation		

Clause:
The facility shall have a written document control procedure in place that ensures all documents and procedures necessary for compliance with the full scope of the Seafood Processing Standard (including Annexes) are in place and effectively controlled.

Explanation:
Document control procedure was documented in Document Control (Doc No. SOP/13 I07 R00 Dt.2024-06-01). Management Representative is responsible for document control. Master, controlled and obsolete copies of HACCP, SOP's and SSOP's were seen and all the documents were stamped with Master, controlled and obsolete copies. Master list of documents documented in Master list of documents (FMT/SOP/047) Dt.2024-06-01.

Pillar	Reference	Conforming
Food Safety	2.11.2	Yes
Clause and Explanation		

Clause:
The document control procedure shall include how versions are controlled, persons with the authority to modify and authorize them, and measures to ensure outdated or obsolete versions are not used.

Explanation:
The procedure for Control of documents was documented in Document Control (Doc No. SOP/13 I07 R00 Dt.2024-06-01) and it describes how revision changes and who is authorized to make changes and who approves it. For example Manager QA authorizes the changes and Managing Director approves the changes in case of QMS manual. The obsolete documents are stamped as Obsolete and kept separately.

Pillar	Reference	Conforming
Food Safety	2.12.1	Yes
Clause and Explanation		

Clause:
The facility shall prepare and implement standard operating procedures, quality procedures, food safety management procedures, social accountability procedures, and work instructions for all processes and operations having an effect on product safety, legality and quality.

Explanation:
Detailed Procedures related to all the processes and functions were in place in the form of 70 SOP's, 20 SSOP's, 14 cGMP, HACCP, Quality Systems Manual, GMP's , Job responsibilities etc. All the procedures were found to be implemented and maintained.

Pillar	Reference	Conforming
Food Safety	2.12.2	Yes
Clause and Explanation		

Clause:
The facility shall have documented Sanitation Standard Operation Procedures (SSOPs), Good Manufacturing Practices (GMPs), and Hygiene policies and procedures that comply with the standards of both the country in which the facility is located and those countries that receive the final products.

Explanation:
SSOP Manual is in place and a total of 20 SSOP’s were documented. These SSOP’s were developed in line with both the USFDA 8 keys of sanitation, USFDA (Ref: 21 CFR part 123), EU and EIC guidelines. A total of 15 cGMP were developed and formed as GMP manual.

Pillar	Reference	Conforming
Food Safety	2.13.1	Yes
Clause and Explanation		

Clause:
The facility shall maintain records that demonstrate the effective control of product and systems to ensure compliance with the full scope of the Seafood Processing Standard (including its Annexes). Electronic records are acceptable provided they are easily accessible during the audit.

Explanation:
Record control procedure was documented in Control of records (Doc No. SOP/14 I07 R00 Dt.2024-06-01). Records related to all the procedures developed and implemented were maintained to demonstrated effective control for product safety, legality, quality and all other BAP standard requirements. Records are in hard copy form under control of In-charge Departments and Management Representative and readily accessible upon request for review.

Pillar	Reference	Conforming
Food Safety	2.13.2	Yes
Clause and Explanation		

Clause:
The facility shall ensure that all records are 100% complete, securely stored, and readily accessible when needed.

Explanation:
ll the records were 100% complete and securely stored and readily accessible as observed during the audit and as part of the traceability exercise.

Pillar	Reference	Conforming
Food Safety	2.13.3	Yes
Clause and Explanation		

Clause:
Records shall be retained for a time period required to meet customer or legal requirements. At a minimum this shall be product shelf life plus one year.

Explanation:
All the records were retained for 36 months i.e., shelf life + 1 year and same is documented in Control of records (Doc No. SOP/14 I07 R00 Dt.2024-06-01 page No.1). Reviewed Master list of records (FMT/SOP/047A) Dt.2024-08-02.

Pillar	Reference	Conforming
Food Safety	2.13.4	Yes
Clause and Explanation		

Clause:
All food safety, quality, sanitation, and other records shall be filled out according to the frequencies specified in their associated plans (Quality Manual, HACCP plan, SSOP, GMP and Hygiene plans and policies).

Explanation:
All the HACCP records were filled as per the frequency mentioned in the HACCP plan i.e., Antibiotic Testing, Sulphite <10 ppm (Each Lot), Metal detector (Every 1 hr.), Sulphate Test (Every 500 Kg) and Allergen Declaration on Labels (Each lot before starting, Every 1 hr. & at the end of the operation). SSOP records and other monitoring records were filled out at a frequency of documented in SSOP for Master Cleaning Schedules and respective SSOP's.

Pillar	Reference	Conforming
Food Safety	2.13.5	Yes
Clause and Explanation		

Clause:
All monitoring and corrective action records shall be reviewed by an individual other than the person filling them out, and who is qualified to make such evaluations.

Explanation:

All the records were verified by Manager QA.

Pillar	Reference	Conforming
Food Safety	2.13.6	Yes
Clause and Explanation		

Clause:
All records and other documentation shall be prepared accurately and not show evidence or indication of falsification.

Explanation:
The procedure for correcting mistakes in records is described in Control of records (Doc No. SOP/14 I07 R00 Dt.2024-06-01 page No.3). During the audit no evidence of falsification was noticed in records.

Pillar	Reference	Conforming
Food Safety	2.13.7	Yes
Clause and Explanation		

Clause:
Where local, national, or international government auditing or inspection programs exist, these records shall be made available for review by the GAA auditor.

Explanation:
Yes, current records for national auditing of inspection program is available. Reviewed records of inspection Assistant Director from Export Inspection Agency Dt. 2023-12-21 is available.

Pillar	Reference	Conforming
Food Safety	2.13.8	Yes
Clause and Explanation		

Clause:
HACCP Records shall be reviewed by a HACCP-trained individual. For the records review of Low Acid Canned Foods (LACFs) product records reviewer must have had a higher level of training, for example; completion of the US FDA Better Process Control School course or equivalent, and who has successfully completed training in the development and application of risk-based preventative controls.

Explanation:
All the CCP records and other HACCP records were verified by Manager QA and having a training on Seafood HACCP conducted on 12 to 15 March 2012 conducted by The Marine Products Export Development Authority.. Training records kept on file. The facility not producing Low Acid Canned Foods.

Pillar	Reference	Conforming
Food Safety	2.14.1	Yes
Clause and Explanation		

Clause:
The facility shall ensure that procedures for the determination and implementation of corrective action, in the event of any non-conformity, are prepared and documented. These shall cover the full scope of the SPS Standard (including its Annexes) and shall also address how future reoccurrences will be prevented.

Explanation:
The procedure for Corrective Action documented in Corrective Action & Preventive Action (Doc No. SOP/12 I07 R00 Dt.2024-06-01) is in place and it details how to correct different deviations occurs in different sections related to Food safety and Quality and all the necessary details of the standard. Corrective actions taken for all the nonconformity found were recorded in Corrective action and Non conformance Record (FMT/SOP/70) Dt.2024-09-29 . Reviewed record the floor found be broken in chill room No.1 and proper corrective action, preventive actions were initiated are meeting the standard requirement.

Pillar	Reference	Conforming
Food Safety	2.14.2	Yes
Clause and Explanation		

Clause:
Non-conformities must be recorded, and it is the facility's responsibility to investigate the cause of the problem(s) and ensure that an adequate response is taken by specified personnel.

Explanation:
Corrective actions taken for all the nonconformity found were recorded in Corrective Action & Preventive Action (Doc No. SOP/12 I07 R00 Dt.2024-06-01). Corrective actions taken for all the
nonconformity found were recorded in Corrective action and Non conformance Record (FMT/SOP/70) Dt.2024-09-29 . Reviewed record the floor found be broken in chill room No.1 and proper corrective action, preventive actions were initiated are meeting the standard requirement.

Pillar	Reference	Conforming
Food Safety	2.14.3	Yes
Clause and Explanation		

Clause:
These actions shall be included in a regular review of activities and systems. If time scales for actions are not met, it is expected that the reason for this is recorded. The review shall include the effectiveness of the action (e.g. whether the action has ensured that similar non-conformities will not occur).

Explanation:
As per the non conformance report review, there is no evidence of recurrence in the last calendar year as per record review.

Pillar	Reference	Conforming
Food Safety	2.15.1	Yes
Clause and Explanation		

Clause:
The facility shall ensure that any product which does not conform to requirements, is clearly identified and controlled to prevent unintended use or delivery. This shall include all products that do not conform to food safety, quality, legality, or customer specification requirements.

Explanation:
A detailed Procedure documented in Handling Non conformance products (Doc No. SOP/11 I07 R00 Dt.2024-06-01) is developed and implemented. Procedure includes handling of nonconforming products and storing at designated space in cold store. "Nonconforming Product Area" is available in the cold store to store the nonconforming product. Register for Non conforming products (FMT/SOP/051) Dt.2023-08-24 and the product Raw peeled deveined tail off shrimp IQF, size 26/30 observed with tails and proper corrective and preventive actions were initiated are meeting the standard requirement.

Pillar	Reference	Conforming
Food Safety	2.15.2	N/A
Clause and Explanation		

Clause:
These activities shall be defined in a documented procedure that is securely stored and readily accessible when needed.

Explanation:
Refer to clause no. 2.15.1.

Pillar	Reference	Conforming
Food Safety	2.16.1	Yes
Clause and Explanation		

Clause:
The facility shall have a documented procedure that describes how product safety and quality will be maintained in the event of a serious incident such as fire, flood, chemical leaks, extended power outages, and structural integrity issues.

Explanation:
The incident management procedure was documented in Emergency Response Preparedness (Doc No. SOP/57 I07 R00 Dt.2024-06-01) is seen and it addresses about corrective and preventive actions to be taken to make sure that the product is safe in case of serious incidents like ammonia leaks, fire, Weather Emergencies, Bomb Threats, Bio terrorism, Disruptive Behaviors, Suspicious Mails and Utility Failure. The procedure addressing both people safety and product safety.

Pillar	Reference	Conforming
Food Safety	2.16.2	Yes
Clause and Explanation		

Clause:
Serious incidents that occur at the facility as described in 2.16.1 shall be documented. Records of product handling and disposition during and after the incident shall be maintained. Facility shall also have a description of how business continuity will be maintained in the event of a serious incident. This shall cover at a minimum how product integrity, worker safety and key facility operations will be maintained.

Explanation:
The format for recording serious incidents is developed and recorded in Mock Drill (FMT/SOP/096). I reviewed the mock drill record for the scenarios of ammonia gas leak Dt. 2024-10-04 and fire in workers dormitory Dt. 2024-08-05 and it includes the details of product handling and disposition during and after the incident.

Pillar	Reference	Conforming
Food Safety	2.17.1	Yes
Clause and Explanation		

Clause:
There shall be a written Recall Plan that addresses how product that has been shipped will be identified, located, and recalled in the event of rejection or non-conformity related to food safety, legality or quality. This plan shall also ensure that non-conforming or recalled products are not mixed with others or released inappropriately.

Explanation:
Product Recall Procedure documented in Recall Procedure (Doc No. SOP/28 I07 R00 Dt.2024-06-25) is in place and it is addressing all the standard requirements like identification of product, recalling product, types of recalls etc.

Pillar	Reference	Conforming
Food Safety	2.17.2	Yes
Clause and Explanation		

Clause:
The Recall Plan shall list all personnel that are part of the "recall team."

Explanation:
Recall team is listed in Recall Team and their responsibilities were well defined in Crisis Management Team (Doc No. SOP/32 I07 R00 Dt.2024-06-01).

Pillar	Reference	Conforming

Food Safety	2.17.3	Yes
Clause and Explanation		

Clause:
The recall plan shall be tested at a minimum annually through a "mock recall" test. The results of the test shall be documented. The results shall identify, at a minimum: the "mock" incident, identification of all product affected and where it was shipped, how customers that received it were (or would have been) notified, and what percentage of product was successfully identified to be "recalled". Each test shall also record how long the mock recall took.

Explanation:
Mock recall is conducted once in 6 months and it is last conducted on Dt.2024-09-30, Dt.2024-04-25. The product affected is Raw Vannamei Peeled deveined Tail on Shrimp IQF size 26/30 - 350 cases and the product present in the customer warehouse at USA and it was not distributed and 100% of the product produced are located with in 1 hr. 45 min.

Pillar	Reference	Conforming
Food Safety	2.17.4	Yes
Clause and Explanation		

Clause:
The "mock recall" trials shall successfully identify 100% of the product (except for natural wastage e.g. drip and weight tolerances due to the use of tares and equipment accuracy). Corrective action shall be taken for any deficiencies identified in the mock recall or traceability system. These corrective actions shall be documented.

Explanation:
Refer to clause no. 2.17.3.

Pillar	Reference	Conforming
Food Safety	2.17.5	Yes
Clause and Explanation		

Clause:
There shall be a procedure that identifies a designated area for recalled product as well as a designated management person for determining disposition or disposal.

Explanation:
Product Recall Procedure documented in Recall Procedure (Doc No. SOP/28 I07 R00 Dt.2024-06-25 page No.2) is addressing all the standard requirements and Incident Management Committee will take the decision of product disposal. A separate area is identified in all the freezer storage No.2 for storing recalled products.

Pillar	Reference	Conforming

Food Safety	2.18.1	Yes
Clause and Explanation		

Clause:
The facility shall prepare and implement an effective system for the management of customer complaints to control and correct shortcomings in food safety, quality and legality.

Explanation:
SOP for Customer Complaints was documented in Customer complaints (Doc No. SOP/10 I07 R00 Dt.2024-06-10). Plant also covers complaints handling in its Internal Audit and Management Review Meetings also. Customer complaints are documented in Customer complaint record (FMT/SOP/046). There are no customer complaints.

Pillar	Reference	Conforming
Food Safety	2.18.2	Yes
Clause and Explanation		

Clause:
All customer complaints shall be documented. Records shall include: the nature of the complaint, investigation, product affected, root cause analysis, corrective and preventive action, product disposition where appropriate, and final complaint resolution.

Explanation:
The customer complaints documented in Customer complaints (Doc No. SOP/10 I07 R00 Dt.2024-06-10). Plant also covers complaints handling in its Internal Audit and Management Review Meetings also. Customer complaints are documented in Customer complaint record (FMT/SOP/046). There are no customer complaints.

Pillar	Reference	Conforming
Food Safety	3.1.1	Yes
Clause and Explanation		

Clause:
All elements of the facility's Food Safety Management System (e.g. the HACCP, GMP, Hygiene, SSOP, Food Defense Plan, and other related plans) shall be documented, implemented, maintained and continually improved.

Explanation:
The company has developed, implemented and maintained QMS as part of Quality Systems Manual. QMS is well maintained through proper document control procedures and reviewed annually. The system is last reviewed on I07 R00 Dt. 2024-06-01.

Pillar	Reference	Conforming
Food Safety	3.2.1	Yes

Clause and Explanation

Clause:
The facility's HACCP system shall be systematic, comprehensive and thorough and shall be in compliance with both local and national legislation and the legislation of the countries the facility exports to.

Explanation:
HACCP System developed by company is systematic, comprehensive and through and it is based on standards equivalent to Codex Alimentarius Commission (092-1981, rev 1-1995) HACCP Principles and USFDA Fish and Fishery Products hazards and guidance, 4th Edition June, 2022 and EU Directives. It is also referring to local legislation i.e., EIC Executive decision (Doc. No. EIC/F&FP/Ex.INST/March/2012/ Issue 4.

Pillar	Reference	Conforming
Food Safety	3.2.2	Yes
Clause and Explanation		

Clause:
The HACCP plan and hazard analysis shall include, at minimum (depending upon the country of operation and the country to which the product will be exported), at least those hazards identified by Codex Alimentarius, or the USFDA's "Fish and Fisheries Products Hazards and Controls Guide" (aka "FDA Hazards and Controls Guide"), current edition. Where local or export country(ies) requirements are stricter, those requirements shall prevail. In the absence of specific legislation or guidance for local or export country(ies), the hazards defined in the aforementioned "FDA Hazards and Controls Guide" shall become the default position to which all facilities shall comply.

Explanation:
Facility developed their HACCP in line with Codex Alimentarius and Fish and Fishery Products Hazards and Controls Guidance Fourth Edition – June 2022 and same is stated as Declaration . Same is also realized while reviewing the HACCP documents.

Pillar	Reference	Conforming
Food Safety	3.2.3	Yes
Clause and Explanation		

Clause:
The scope of the HACCP system shall be defined per product, per process line/or process-location. It shall include verified process flow diagram(s), the description of the product and its presentation(s), intended use, and method of distribution. The accuracy of the process flow diagram shall be verified, at a minimum, annually by all members of the HACCP team.

Explanation:
HACCP plans were developed and they include 2 different types of lines as Raw Block Frozen & Raw Individually Quick Frozen product freezing and this plans covers all the products produced on site.
1. Product Information - Product Profile Raw Block Frozen Aquaculture Raised Shrimp (Doc No. HACCP/08 I07 R00 Dt.2024-06-01 page No.1) and Product Profile Individually Quick Frozen Aquaculture Raised Raw Shrimp (Doc No. HACCP/10 I07 R00 Dt.2024-06-01 page No.1). The document detail about description of the product and its presentation and method of distribution. Intended Use and Customer detail about intended use & targeted customers documented in Intended use of product (Doc No. HACCP/08 I07 R00 Dt.2024-06-01 page No.2).
2. Process flow chart - Process flow chart block frozen aquaculture raised shrimps (Doc No. HACCP/08 I07 R00 Dt.2024-06-01 page No.3), Process flow chart Raw IQF frozen aquaculture raised shrimps (Doc No. HACCP/10 I07

R00 Dt.2024-06-01 page No.3).
3. Onsite confirmation of process flow chart - Raw Block Frozen Shrimps (Doc No. HACCP/08 I07 R00 Dt.2024-06-01 page No.4), Onsite confirmation of process flow chart - Raw IQF Shrimps (Doc No. HACCP/10 I07 R00 Dt.2024-06-01 page No.4). The accuracy of process flow diagram verified annually and if any change in product or equipment.

Pillar	Reference	Conforming
Food Safety	3.2.4	Yes
Clause and Explanation		

Clause:
All facilities shall apply the seven HACCP-principles to the HACCP System.

Explanation:
Applicant applied 5 steps & 7 principles of HACCP. 5 steps are Formation of HACCP Team, Product Description, Intended Use & Customer, Process flow Diagram, On site verification of flow diagram. 7 Principles are Hazard Analysis, Identifying CCP's, Critical Limits, Monitoring of CCP's, Corrective Action, Record Keeping and Verification Procedure.

Pillar	Reference	Conforming
Food Safety	3.2.5	Yes
Clause and Explanation		

Clause:
All Critical Control Points (CCPs) shall be properly identified and procedures accurately followed in order to control or prevent hazards.

Explanation:
CCP's were identified by using 5 question CCP decision tree by applying this to all the significant hazards identified as part of hazard analysis. A total of 4 CCP's were Identified for raw Frozen products 1. Raw Material Receiving, 2. Metal Detection and 3. Labelling (Allergen), 4. Keep Frozen.

Pillar	Reference	Conforming
Food Safety	3.2.6	Yes
Clause and Explanation		

Clause:
The HACCP plan and hazard analysis shall include a list of all allergens present at the facility, including the various species of seafood handled, and each species must be identified by their scientific name. All allergens shall be effectively controlled throughout receipt, storage, handling and use.

Explanation:
Allergens are included in HACCP plans and hazard analysis include allergens. Facility handles one allergen i.e., Shrimp, which is a part of all the products produced at the facility. Hazard analysis includes Allergens (Sulphites & Shrimp) and

Raw material receiving and labeling were identified as CCP’s to control the entry of allergen (Sulphite) in to the product and labeling is identified as CCP to declare allergens ("Contains Shrimp").

Pillar	Reference	Conforming
Food Safety	3.2.7	Yes
Clause and Explanation		

Clause:
In addition to the requirements stated in 3.2.6, the facility shall demonstrate that they have adequately labeled the presence of allergens. The HACCP plan must address how the facility will label the presence of allergens in the finished product.

Explanation:
Labelling is identified as CCP for declaration of Allergens (Contains Shrimp) and Keep Frozen for all products produced at the facility (HACCP Plans - HACCP/).

Pillar	Reference	Conforming
Food Safety	3.2.8	Yes
Clause and Explanation		

Clause:
All critical limits set at each CCP shall be properly determined and followed. Critical limits shall be based on validated processes, industry standards or scientific and regulatory guidance.

Explanation:
CCP's were identified by using 5 question CCP decision tree by applying this to all the significant hazards identified as part of hazard analysis. A total of 3 CCP's were Identified for Raw Frozen products 1. Raw Material Receiving - Antibiotics, Sulphite, Pesticides and Heavy metals - Critical Limits are Absent, 2. Metal Detection - Critical limits are metal test pads Fe - 1.5 mm, NFe - 2.2 mm and SS - 3.0 mm and 3. Labelling - Critical limits are Contains Shrimp (Allergen) 4. Keep Frozen statement .

Pillar	Reference	Conforming
Food Safety	3.2.9	Yes
Clause and Explanation		

Clause:
Monitoring procedures adequate to control each hazard at each CCP shall be developed and documented in the HACCP plan. These procedures shall include the monitoring frequency, methods, responsible employees, and associated records.

Explanation:
HACCP plans are detailing about all the parameters required by the standard. Refer to clause no. 3.2.8 for more details. CCP Records verified are as follows.

CCP1 - Antibiotics, Sulphite, Pesticides and Heavy metals - Monitoring frequency each lot - Responsible person QA Technologist - Records reviewed Declaration Report (FMT/GMP/022) Dt.2024-10-07, Internal Antibiotic Test Report (FMT/SOP/160) reviewed Dt. 2024-10-01, Raw material receiving and evaluation sheet (for Sulphite) (FMT/SOP/023) Dt.2024-10-07, external lab report for Nitrofuran metabolites, Chloramphenicol, Florfenicol, Fluoroquinolones & Quinolones, Sulphonamides, Pesticide Residues, Sulphite and Heavy metals Report. No.QFD24090276-01 Dt.2024-09-13 issued by SMS Labs Services Private Limited, Chennai.
CCP2 - Metal test pads Fe-2.0 mm, N. Fe-2.5 mm and SS-3.0 mm - Monitoring frequency every 1 hr. - Responsible person QA Technologist - Records reviewed Checklist for Metal Contamination, Calibration of Metal Detector IQF (FMT/SOP/031) Dt. 2024-10-07. CCP3- Contains Shrimp (Allergen) - Monitoring frequency before start up, each lot, any change,
every 1 hr. and at the end of operation - Responsible person QA Technologist - Records reviewed Checklist for Label Verification (FMT/SOP/090) Dt. 2024-10-07. CCP4- Keep Frozen - Monitoring frequency before start up, each lot, any change, every 1 hr. and at the end of operation - Responsible person QA Technologist - Records reviewed Checklist for Label Verification (FMT/SOP/090) Dt. 2024-10-07.

Pillar	Reference	Conforming
Food Safety	3.2.10	Yes
Clause and Explanation		

Clause:
The facility shall identify in the HACCP plan, corrective actions that shall be taken any time a critical limit is not met at any CCP. The corrective actions taken shall be documented. The corrective actions shall include product disposition, as well as root cause and future prevention. (Reference also clause 2.15 "Control of Non-Conformity").

Explanation:
All the corrective actions taken were handled as per the nonconforming product procedure (Refer to clause no. 2.15 for more details). Refer to clause 3.2.8 for more details.

Pillar	Reference	Conforming
Food Safety	3.2.11	Yes
Clause and Explanation		

Clause:
A properly functioning metal detector or x-ray machine shall be in place to check all frozen finished product unless the facility can demonstrate, through hazard analysis in its HACCP Plan, that it is not reasonably likely to expect that metal fragments could enter the food.

Explanation:
There are 02 metal detectors for primary packaging and secondary packaging 01 are available in the plant and they are provided with auto rejection with alarm system for the product with primary packaging and metal detector control panels were secured to prevent unauthorized access. Each production line the metal detectors were placed in between next to the product packed in primary packaging and before packing into the secondary packaging.

Pillar	Reference	Conforming
Food Safety	3.2.12	Yes

Clause and Explanation

Clause:
Facilities shall include in the hazard analysis, potential hazards from environmental contaminants at the farm or harvest sites they purchase from. This includes chemicals, pesticides or heavy metals that may originate from industrial or agricultural operations near the producing farm or harvest sites.

Explanation:
Refer to clause no. 3.2.8. Facility accepting their raw material for non usage of Chloramphenicol, Nitrofuran metabolites, Florfenicol, Quinolones, fluoro quinolones oxytetra cycline, tetra cycline, Malachite Green, Leuco malachite, Oxytetracycline, Sulphonamide (Parent compound) and sum of Gentian Violet tested in-house laboratory for each receiving lot. Pesticides, Heavy metals, environmental contaminants accepted against the supplier guarantee for each receiving lots and verification is done once in 2 months as per the regulatory requirement (Export Inspection Agency) reviewed test report No.QFD24090276-01 Dt.2024-09-13 issued by SMS Labs Services Private Limited, Chennai.

Pillar	Reference	Conforming
Food Safety	3.2.13	Yes
Clause and Explanation		

Clause:
The HACCP plan shall include monitoring at reception (i.e. receiving) for residues of the aquaculture drugs listed in Annex 4, Table II as appropriate for the species.
The facility shall collect 1 sample per receiving lot. (See Annex 1 Glossary for the definitions of "Receiving Lot - Farm Suppliers" and "Receiving Lot - Plant Suppliers").
The facility must have a well-documented testing program in place. Where this program deviates from that specified above (1 sample per receiving lot) the facility must demonstrate that this is based on risk assessment or historical analysis of test results. Refer to Annex 4 Guidelines for testing requirements for details and clarification on reduction of requirements.
(Note: Tests may be performed by qualified in-house laboratories or by use of third-party labs.)

Explanation:
As mandated by the state regulatory authority, the use of aquaculture drugs on the farm is strictly prohibited. A risk assessment of raw materials has been conducted and documented. The facility tests its raw materials for residues of aquaculture drugs, specifically Chloramphenicol and nitrofuran metabolites, for each receiving lot as per Annex 4 Table II, which is documented in the Internal Antibiotic Test Report (FMT/SOP/160) reviewed Dt. 2024-10-01. Additionally, other parameters such as quinolones, fluoroquinolones, oxytetracycline, tetracycline, Malachite Green, Leuco malachite, Oxytetracycline, Sulphonamide (Parent compound), and the sum of Gentian Violet and Florfenicol are tested once every two months in a regulatory body approved third-party laboratory. The latest test report (QFD24090276-01) issued by SMS Labs Services Private Limited, Chennai, dated September 13, 2024, confirms this.

Pillar	Reference	Conforming
Food Safety	3.2.14	Yes
Clause and Explanation		

Clause:
Antibiotics or chemicals that are proactively prohibited in the producing or importing country shall not be used in feeds or any other form of treatment. Further, the facility shall include in their HACCP plan, testing for other approved and unapproved and/or banned drugs at reception, beyond those listed in Annex 4, Table II, where compliance with local or

country of export laws or buyer specifications require it. (Refer to Standard 1 - "Regulatory Management" system requirements).

Explanation:
Facility conduct the testing of their raw materials at reception for all the drugs that are listed by country of import for those particular lots exported to respective countries as per state regulatory authority Executive Instruction(Export Inspection Council of India). Refer Clause no: 3.2.13.

Pillar	Reference	Conforming
Food Safety	3.2.15	N/A
Clause and Explanation		

Clause:
For Re-processors: Processors in this category that receive processed product from a Primary (first) processor, compliance with clause 3.2.13 is required in one or more of the following ways:
A. Address the hazard in the hazard analysis and conduct testing at reception;
B. Address the hazard in the hazard analysis and justify, where the conclusion is that the primary processor must control it, how that is to be assured (i.e. incorporate the requirement for them to test as part of the Purchasing specifications and Supplier Approval and Performance Monitoring requirements in sections 2.8 and 2.10). Test reports shall be obtained from the primary processors.

Explanation:
No Such Product processed and packed by the facility.

Pillar	Reference	Conforming
Food Safety	3.3.1	N/A
Clause and Explanation		

Clause:
Facilities producing Thermally Processed Low-Acid Foods Packaged in Hermetically Sealed Containers (referred to as LACFs) shall be compliant with US FDA or equivalent regulations in both country of origin and the countries of export governing processing of these products.

Explanation:
No Such Product processed and packed by the facility.

Pillar	Reference	Conforming
Food Safety	3.4.1	N/A
Clause and Explanation		

Clause:
Facilities producing cured, salted, and/or smoked products shall apply the guidelines for such products as specified in the AFDO Code for Cured, Salted, and Smoked Fish or equivalent in both country of origin and the countries of export.

Explanation:
No Such Product processed and packed by the facility.

Pillar	Reference	Conforming
Food Safety	3.5.1	Yes
Clause and Explanation		

Clause:
The HACCP Team shall meet regularly to review HACCP compliance and assess the need for plan revisions. The team shall consist of appropriately qualified multi-disciplinary personnel (i.e. operations, quality assurance, and engineering/maintenance, at the very least) with a designated team leader defined. Such reviews shall be conducted to assess effectiveness and shall be conducted in advance of any change in the product, processes, ingredients, etc. that may have an impact on food safety. Records of these meetings shall be kept. Where there have not been any changes, such meetings and plan assessments shall occur at minimum annually.

Explanation:
The HACCP team meetings are conducted once in a year and whenever required as per the procedure documented in HACCP System Review & Records (Doc No. SOP/09 I07 R00 Dt.2024-01-01). Last review was conducted on 2024-05-28 and records reviewed HACCP System review (FMT/SOP/098) is on file.

Pillar	Reference	Conforming
Food Safety	3.5.2	Yes
Clause and Explanation		

Clause:
Such a review shall also evaluate the need for changes to other components of the facility’s food safety management system, including but not limited to specifications, outsourced activities, supplier performance monitoring, food safety policy and food safety objectives. Usage of chemicals shall also be reviewed to ensure that such usage conforms to the regulations of both the country where production occurs, and the country to which the products will be exported.

Explanation:
Facility reviewed Food Safety Policy & Objectives, specifications and supplier performance monitoring as part of management review conducted on Dt.2023-09-09. Records of review were on file, refer to section 2.7 for more details.

Pillar	Reference	Conforming
Food Safety	3.6.1	Yes
Clause and Explanation		

Clause:
The facility shall have a documented food fraud vulnerability assessment procedure (VACCP Vulnerability Assessment Critical Control Points) in place to identify potential vulnerability and prioritize food fraud mitigation measures.

Explanation:
The facility has documented Food fraud control plan (Doc No.SOP/61 I07 R00 Dt.2024-06-01) and the VACCP conducted for raw material,packaging and Ingredients documented in Food fraud vulnerability assessment (FMT/SOP/149) Dt.2024-01-01. The vulnerability assessment addressed the identification potential vulnerability and prioritize food fraud mitigation measures.

Pillar	Reference	Conforming
Food Safety	3.6.2	Yes
Clause and Explanation		

Clause:
The food fraud plan and risk assessment shall be reviewed, at minimum, annually.

Explanation:
The food fraud plan and risk assessment reviewed annually. The last review conducted on Dt.2024-01-01.

Pillar	Reference	Conforming
Food Safety	3.6.3	Yes
Clause and Explanation		

Clause:
The facility shall have a documented plan in place that specifies the measures the organization has implemented to mitigate the public health risks from the identified food fraud vulnerabilities including those that might arise due to outsourced activities.

Explanation:
The facility having documented plan for mitigate the public health risks from the identified food fraud vulnerabilities documented in Food fraud control plan (Doc No.SOP/61 I07 R00 Dt.2024-06-01).

Pillar	Reference	Conforming
Food Safety	3.6.4	Yes
Clause and Explanation		

Clause:
The facility's Food fraud mitigation plan shall be supported by the organization's Food Safety Management System.

Explanation:
The facility has Food fraud mitigation plan and addressed in the Food fraud control plan (Doc No.SOP/61 I07 R00 Dt.2024-06-01). The facility discussed their food fraud mitigation plan during management review meeting on Dt.2023-09-09.

Pillar	Reference	Conforming
Food Safety	3.7.1	No - Minor
Clause and Explanation		

Clause:
The facility shall have a documented risk assessment system and procedure (TACCP - Threat Assessment Critical Control Points) in place to identify and address food defense risks. This shall be established, implemented and maintained to prevent, reduce or eliminate these risks and shall be included in the facility's Food Safety Management System. The Food Defense plan and risk assessment shall be reviewed, at minimum, annually. (Note: Food Defense risks are facility security/sabotage related. For instance: tampering or adulteration of product or the water supply by entry of unauthorized personnel, entry by disgruntled or terminated employees, uncontrolled access to storage areas, or access to and misuse of toxic compounds in the facility).

Explanation:
A Risk Assessment for Food Defense (FMT/SOP/111) dated 2024-08-02. This document addresses all food defense risks. The raw material vehicles are fitted with tamper-evident seals at the farm. However, there is no evidence of verification of seals for tampering after the material is received at the processing plant.

Pillar	Reference	Conforming
Food Safety	3.7.2	Yes
Clause and Explanation		

Clause:
Employee members responsible for the implementation of the food defense plan (the "food defense team") shall be clearly identified in the document. They must demonstrate sufficient knowledge in this area to ensure the effective implementation of the food defense plan. The food defense team must ensure that the mitigation strategies are assessed to verify that the food defense plan is being effectively implemented.

Explanation:
The employees responsible for the Food defense plan are Managing Director, General Manager, Plant Manager, Quality Assurance Manager, Production Manager, Purchase In-charge, Technologist, Machinery In-charge and Security In-charge documented in Emergency response and preparedness (Doc No.SOP/57 I07 R00 Dt.2024-06-01 page No.9). The employees demonstrated their knowledge in food defense plan.

Pillar	Reference	Conforming
Food Safety	3.8.1	Yes
Clause and Explanation		

Clause:
The facility shall have in place an effective pest control program/system that prevents and controls risk of pest infestation and harborage areas inside the facility and on facility grounds. Pest control shall be performed by either a licensed third-party or properly trained personnel within the facility. Chemicals used in food facilities shall meet at minimum US EPA standards or equivalent.

Explanation:

The procedure for Pest Control documented in Exclusion of Pests (Doc No. SSOP/13 I07 R00 Dt.2024-06-01) is developed and well implemented. Innovative pest control is providing the pest control services at this facility. A contract dated Dt.2024-08-01 valid till Dt.2025-07-31 is in place. License of the Pest Control Service provider is on file License No. 50/2019 Dt. 31-12-2023. The chemical used in the facility are meeting US EPA standards.

Pillar	Reference	Conforming
Food Safety	3.8.2	No - Minor
Clause and Explanation		

Clause:
Litter and discarded equipment shall be properly disposed of to avoid the creation of pest harborage areas.

Explanation:
All litter was found to be properly contained. However, I have noticed that spacers (which are used during finished product loading), as well as other unused equipment like WPVC frames and empty oil containers, were stored directly on the floor of the finished product loading platform. This could create a potential pest harborage.

Pillar	Reference	Conforming
Food Safety	3.8.3	Yes
Clause and Explanation		

Clause:
Windows, doors, walls and other openings to the outside of the facility shall be adequately sealed, screened or covered to exclude pests. In addition, facilities shall ensure all proper steps are taken to prevent pest entry through effective building design, maintenance, operational procedures and employee training.

Explanation:
All windows, doors, walls and other openings to the outside of the facility are adequately sealed, screened or covered to avoid entry of pests in to the facility.

Pillar	Reference	Conforming
Food Safety	3.8.4	Yes
Clause and Explanation		

Clause:
There shall be a sufficient number of pest traps at appropriate locations.

Explanation:
All pest traps present in facility are with sufficient number and placed in appropriate locations. The pest traps were properly working and maintained in good condition.

Pillar	Reference	Conforming
Food Safety	3.8.5	Yes
Clause and Explanation		

Clause:
All pest traps (electronic, baited, etc.) shall be located so as not to contaminate food-processing areas. Poison bait traps shall not be located inside food production or storage areas.

Explanation:
All the pest traps are baited and are located away from the food processing area. The traps placed inside the production area are Glue trap.

Pillar	Reference	Conforming
Food Safety	3.8.6	Yes
Clause and Explanation		

Clause:
The facility shall have a program for pest trap inspection that includes a map of trap locations, regular cleaning and records of pests caught.

Explanation:
The Pest control trap locations were documented in Bait Trap (Annexure - III) Dt. 2024-06-01, Bait trap register (FMT/SSOP/011) Dt. 2024-10-07. The facility having a pest control inspections and observations recorded in Daily Activity Report (From Service Provider) Dt.2024-10-07, Pest control register (FMT/SSOP/004) Dt.2024-10-07, Fly Analysis (FMT/SOP/121) Dt. 2024-10-07 is seen and they cover all the pest control devices located on the facility.

Pillar	Reference	Conforming
Food Safety	3.8.7	Yes
Clause and Explanation		

Clause:
Pest control inspections shall be assessed and analyzed for trends on a regular basis, at a minimum annually. The results of the analysis shall be used for improvements in pest control systems.

Explanation:
The pest trend analysis performed once in a month reviewed record Fly analysis report from Dt.2024-09-01 to Dt.2024-09-15 (from Service provider) on Dt. 2024-09-16.

Pillar	Reference	Conforming

Food Safety	3.8.8	Yes
Clause and Explanation		

Clause:
All pest traps identified on the pest control map in and around the facility and in storage areas shall be in place and fully functional.

Explanation:
The pest control trap locations were documented in Bait Trap (Annexure - III) Dt. 2024-06-01.

Pillar	Reference	Conforming
Food Safety	3.8.9	Yes
Clause and Explanation		

Clause:
Processing and primary storage areas in the facility shall show no evidence of pests or pest activity (insects, rodents, birds, dogs, cats, feces, urine, etc.).

Explanation:
No pests or pest activity observed in the facility.

Pillar	Reference	Conforming
Food Safety	3.8.10	Yes
Clause and Explanation		

Clause:
All items stored in warehouse areas shall be placed on pallets above the floor and away from walls. All food ingredients and packaging shall be stored in clean areas free of dust and debris and covered and protected from pests and other contaminants.

Explanation:
All materials should be stored away from walls and above the floors in storage areas.

Pillar	Reference	Conforming
Food Safety	3.9.1	Yes
Clause and Explanation		

Clause:
The facility's grounds and outside areas shall be maintained to prevent worker safety hazards, and environmental,

hygiene and pest harborage risks. This shall include proper drainage, and elimination of shrubs, high grass, equipment and other materials close to the facility.

Explanation:
External grounds were generally paved and well maintained to avoid any safety, environmental and pest harbourage risks.

Pillar	Reference	Conforming
Food Safety	3.9.2	Yes
Clause and Explanation		

Clause:
All food contact areas shall be constructed of food grade materials. Bare wood, cloth, corrosive or flaking materials or other non-food grade substances are prohibited.

Explanation:
All food contact surfaces were made of 304 grade SS, food grade Teflon & food grade Plastic . Reviewed certificate of food grade for plastic for crates and basins issued by M/s. Supreme Industries Limited, Pollepally , Mahabubnagar Dt. 2023-02-06, and for IQF Freezer issued by Glory Co. Ltd., Ho Chi Minh City, Vietnam Dt.2021-08-09. Manufacturer's instructions were considered while usage to minimize any risks during production.

Pillar	Reference	Conforming
Food Safety	3.9.3	Yes
Clause and Explanation		

Clause:
Restrooms and other personal hygiene areas shall open directly into transition areas with proper sanitation controls and not directly into processing areas inside the plant.

Explanation:
All the rest rooms were opening in to change rooms and some rest rooms were located away from the facility. Hand wash sinks equipped with soap dispensers and drying facilities were provided outside the rest rooms.

Pillar	Reference	Conforming
Food Safety	3.9.4	Yes
Clause and Explanation		

Clause:
Internal floors and walls shall be made of a smooth, impermeable material that can be readily cleaned and sanitized.

Explanation:

The floor in raw material receiving area, pre processing and processing area are made is made with kota stone and walls are made with ceramic glazed tiles height up to the ceiling are easily cleanable.

Pillar	Reference	Conforming
Food Safety	3.9.5	Yes
Clause and Explanation		

Clause:
The corners between the walls and floors shall either be rounded, or properly sealed and maintained to prevent the accumulation of waste and contaminants.

Explanation:
All the corners between the walls and floors are tiled for proper sealing is evident.

Pillar	Reference	Conforming
Food Safety	3.9.6	Yes
Clause and Explanation		

Clause:
Floors of the facility shall have adequate drainage, including during peak water volumes, to avoid pooling and the accumulation of waste and contaminants.

Explanation:
The facility floors made with kota stone properly sloped to avoid water puddles and have adequate drainage system.

Pillar	Reference	Conforming
Food Safety	3.9.7	Yes
Clause and Explanation		

Clause:
The facility shall maintain sufficient separation of space between finished and unfinished products to prevent cross contamination.

Explanation:
All the areas of finished and un finished products were well segregated and facility maintain unidirectional process flow to avoid cross contamination.

Pillar	Reference	Conforming

Food Safety	3.9.8	Yes
Clause and Explanation		

Clause:
All equipment shall be designed, installed, constructed, and used to prevent product contamination.

Explanation:
All the equipment's were well maintained and are made of SS or Food grade plastic and they are easily cleanable.

Pillar	Reference	Conforming
Food Safety	3.10.1	Yes
Clause and Explanation		

Clause:
An effective maintenance program, including preventative maintenance, shall be in place and documented. This program shall include walls, floors and all items of equipment and other food contact surfaces critical to product quality and safety. The program shall include at a minimum: A. An itemized list of items and areas to be maintained B. A preventative maintenance schedule C. Records of inspections and maintenance performed.

Explanation:
Maintenance procedure documented in Plant Maintenance (Doc No. SOP/45 I07 R00 Dt.2024-06-01) is developed and well implemented. Preventive maintenance schedule documented in Maintenance schedule (FMT/SOP/101P) Dt.2024-01-06 was includes Daily, weekly, monthly half yearly and yearly. Maintenance records reviewed – Plant Maintenance Schedule - Daily (FMT/SOP/082) Dt.2024-10-07 for grading machine, Plant Maintenance Schedule - Weekly (FMT/SOP/082) Dt.2024-10-04 for IQF Machine, Plant Maintenance Schedule - Monthly (FMT/SOP/101C) Dt.2024-10- 04 for chill room. Breakdown Record (FMT/SOP/056) reviewed record Dt.2024-09-24 and it includes Post Maintenance Hygiene Clearance Report. The preventive maintenance schedule doesn't label printing machine present in freezer storage area.

Pillar	Reference	Conforming
Food Safety	3.10.2	Yes
Clause and Explanation		

Clause:
There shall be a foreign materials prevention program (or series of separate programs), that prevents contamination from all forms of foreign material. Including but not limited to paint, wood, glass, plastic, metal, hair, rust, etc.

Explanation:
The foreign material prevention program documented in Glass Policy & Hard Plastic Policy (Doc No. SSOP/23 I07 R00 Dt.2024-06-01), Metal Policy (Doc No. SSOP/24 I07 R00 Dt.2024-06-01) were developed and well implemented. Records Daily monitoring record for Hard plastic items (FMT/SSOP/001F) Dt.2024-10-06, Monitoring record for stationary objectives (FMT/SSOP/001G) Dt.2024-10-07, Glass Control Record (FMT/SOP/142) Dt.2024-10-03, Daily HACCP Sanitation/General Maintenance Routine checklist of the factory (FMT/SSOP/001) Dt.2024-10-07, Knife & Scissors Issue/Recovery Register (FMT/SOP/124) Dt.2024-10-07, Metal Detectable Plaster Monitoring Record (FMT/SOP/31B) Dt.2023-09-20, Metal Detectable Pens Issue/Recovery Register (FMT/SOP/QC/34/PEN) Dt.2024-10-07, Gloves inspection pre - processing (FMT/SSOP/003A) Dt.2024-10-07 were verified.

Pillar	Reference	Conforming
Food Safety	3.10.3	Yes
Clause and Explanation		

Clause:
All overhead lights in food production and primary storage areas shall be shielded or made of shatterproof material to prevent glass contamination of product from broken bulbs.

Explanation:
All the overhead lights in food production area were covered with shatterproof material (Acrylic) sheets.

Pillar	Reference	Conforming
Food Safety	3.10.4	Yes
Clause and Explanation		

Clause:
The facility shall provide sufficient lighting to properly carry out processing activities.

Explanation:
Adequate lighting is provided in all sections of the facility to carry out processing activities comfortably. Reviewed Lux monitoring record (FMT/GMP/171) Dt.2024-09-06.

Pillar	Reference	Conforming
Food Safety	3.10.5	Yes
Clause and Explanation		

Clause:
The roofs of food production, food packaging, ingredients and chemical storage areas shall be maintained. There shall be no evidence of leaks, mold, rust or flaking paint.

Explanation:
Roofs of production, packaging storage, ingredient storage and chemical storage were well maintained and no leaks were observed.

Pillar	Reference	Conforming
Food Safety	3.10.6	Yes
Clause and Explanation		

Clause:
Painted surfaces in food production and primary storage areas shall be in good condition and free of chipping or flaking.

Explanation:
The painting surfaces present in food production and primary storage areas kept in good condition without any Chipping or flaking.

Pillar	Reference	Conforming
Food Safety	3.10.7	Yes
Clause and Explanation		

Clause:
All floor surfaces in food production and primary storage areas shall be in good condition, and free of significant cracks or gouging. Where minor damage exists, the floor shall show that attempts to properly keep up with the maintenance are being made through evidence of repair and appearance on a regular maintenance schedule.

Explanation:
The floor in production hall is made with Kota stone and cold store anteroom area are made with RCC flooring and PUF panels in processing hall are easily cleanable.

Pillar	Reference	Conforming
Food Safety	3.10.8	Yes
Clause and Explanation		

Clause:
All food contact surfaces, including equipment and utensils, shall be in good condition and free of cracks, pits, gouging and abraded areas.

Explanation:
All food contact surfaces were made of 304 grade SS, food grade Teflon & food grade Plastic. They are smooth and easily cleanable. Condition and Cleanliness of Food Contact Surfaces (Doc No. SSOP/03 I07 R00 Dt.2024-06-01) is addressing about the condition of food contact surfaces.

Pillar	Reference	Conforming
Food Safety	3.11.1	Yes
Clause and Explanation		

Clause:
Work surfaces that come in contact with food products (tables, equipment, utensils, employee gloves and clothing) shall be in good condition and adequately cleaned and sanitized before use. This includes walls in production and food storage areas which shall be kept clean and free of fungal growth.

Explanation:
All the food contact surfaces were cleaned and sanitized after every production run and same is documented in Condition and Cleanliness of Food Contact Surfaces (Doc No. SSOP/08 I07 R00 Dt.2024-06-01) is addressing about the condition of food contact surfaces - records reviewed Daily sanitation audit form (Pre- processing) (FMT/SSOP/002A) Dt.2024-10-07, Daily HACCP Sanitation/General Maintenance Routine checklist of the factory (FMT/SSOP/001) Dt.2024-10-07, Daily sanitation audit form processing (FMT/SSOP/002B) Dt.2024-10-07, Daily equipment inspection report (Pre-Operation) (FMT/SOP/08/01) Dt.2024-10-02, Vehicle washing register (FMT/SOP/040) Dt.2024-10-07, Chlorination checklist (Pre Processing) (FMT/SOP/24-A) Dt.2024-09-07.

Pillar	Reference	Conforming
Food Safety	3.11.2	Yes
Clause and Explanation		

Clause:
Facilities shall maintain a written SSOP that details cleaning frequency and designates implementation and verification responsibilities. The SSOP shall include a risk-based environmental monitoring program for assessing the effectiveness of all cleaning and sanitizing activities that includes all high-risk areas

Explanation:
19 different SSOP's were developed and documented in SSOP manual and all these SSOP's includes detail like cleaning frequency and implementation & Verification responsibilities. All the cleaning records were verified by Manager QA.

Pillar	Reference	Conforming
Food Safety	3.11.3	Yes
Clause and Explanation		

Clause:
Planned and frequent microbial analyses (aka "swab tests", ATP or protein residue tests) of food contact areas shall be carried out after cleaning and sanitizing to verify the adequacy of the sanitation regime.

Explanation:
Microbial analysis of food contact areas is carried out on weekly basis and this covers all the food contact surfaces, same is detailed in Lab Manual - Swab Sampling Schedule . Results were recorded in Register for assessing standards of the unit (FMT/SSOP/017) Dt.2024-10-05 and for high risk area instant swab (ATP) on daily basis doucmented in Register for assessing sanitary standards of the unit (Instant Swab) (FMT/SSOP/017H) Dt.2024-10-07.

Pillar	Reference	Conforming
Food Safety	3.11.4	Yes
Clause and Explanation		

Clause:
All records of verification analyses required under 3.11.3 shall include total or standard plate count, Staphylococcus aureus, Listeria monocytogenes (for RTE processing only), Salmonella spp. (for RTE processing only), and total coliforms

at minimum. These records shall reflect consistent effort to improve sanitation, as evidenced by analyses of trends in microbiological counts over time.

Explanation:
Register for assessing standards of the unit (FMT/SSOP/017) Dt.2024-10-05 is used to record the results of swab testing and they analyse all the samples for Total Plate Count, Coliform, E. coli, Staphylococcus aureus Listeria monocytogenes and Salmonella.

Pillar	Reference	Conforming
Food Safety	3.12.1	Yes
Clause and Explanation		

Clause:
The facility shall have a documented personal hygiene standard and program that prevents product contamination that, at a minimum, includes the below elements and other related elements of this standard - as well as additional measures as appropriate based on risk.

Explanation:
110.10 Personnel b. Cleanliness (Doc No.GMP/08 I07 R00 Dt.2024-06-01 page No.2) is seen and it include all the detail required by the standard.

Pillar	Reference	Conforming
Food Safety	3.12.2	No - Minor
Clause and Explanation		

Clause:
If local laws require regular health examinations of employees, records that report exam results shall be available for all workers in food production and packing areas.

Explanation:
Regular employee health examinations are required by local regulations, with the facility conducting health checks once every year. The records indicate that health checks were performed on the following employees:

- Ms. Kelli Seetharatnam, Processing Worker (DFL:641), on 2024-08-05
- Kandipilli Sanjana, Processing Worker (1247), on 2024-08-02
- Mr. Bisraba Mallick, Processing Worker (453), on 2024-08-06
- Mr. Ranjan Rana, Processing Worker (DFL:466), on 2024-08-05

According to the Disease Control Policy (Doc No. GMP/08 I07 R00 Dt.2024-06-01, page No.1), all employees were vaccinated before joining work. However, the health card for Kandipilli Sanjana, Processing Worker (1247), does not include any vaccination details, despite her having worked since 2024-05-25.

Pillar	Reference	Conforming
Food Safety	3.12.3	Yes

Clause and Explanation

Clause:
Medical screening procedures shall be in operation for employees, contractors and visitors.

Explanation:
Facility is conducting health check up for all the employees once in a year by external doctor and records were maintained. Facility also monitor the health condition of all the employees before start of the work daily and same is recorded on Sanitary and personal hygiene log (FMT/SOP/23A) Dt.2024-10-01. Visitors and contractors need to fill in the Health status questionnaire - All visitors (FMT/SOP/099) Dt.2024-07-06 as per the documented procedure 110.10 Personnel b. Cleanliness (Doc No.GMP/08 I07 R00 Dt.2024-06-01 page No.2) before entering the facility. Same is given for the auditor before entering the food processing area.

Pillar	Reference	Conforming
Food Safety	3.12.4	Yes
Clause and Explanation		

Clause:
All employees shall be monitored for signs of contagious illnesses (coughing, sneezing, sores, skin infections, etc.) and personnel related food borne illness (diarrhea, fever, jaundice, etc.) upon arrival and during work in food production and packing areas, those found to be ill shall be removed from the plant site (records shall be maintained).

Explanation:
The facility has a monitoring program Sanitary and personal hygiene logging Processing (FMT/SSOP/003-II) Dt.2024-10-07 addressed in the requirement.

Pillar	Reference	Conforming
Food Safety	3.12.5	Yes
Clause and Explanation		

Clause:
The facility shall have a policy in place that requires employees to report immediately to their supervisor if, during the work day, they become injured or ill.

Explanation:
The facility having a policy in place during the work day, they become injured or ill documented in Sanitary and personal hygiene logging Processing (FMT/SSOP/003-II) Dt.2024-10-07.

Pillar	Reference	Conforming
Food Safety	3.12.6	Yes
Clause and Explanation		

Clause:
All workers in food production and packing areas shall not wear jewelry (including earrings, facial piercings, watches, bracelets, false fingernails, false eyelashes, etc.), and shall not carry items in pockets. Medical bracelets, necklaces or wedding bands may be worn with proper protection to prevent food contamination with management approval. Such jewelry shall be smooth with no stones or recessed areas.

Explanation:
No personnel were found with wearing jewellery and the lockers were provided to all the employees in change rooms at entrance to the plant.

Pillar	Reference	Conforming
Food Safety	3.12.7	Yes
Clause and Explanation		

Clause:
Workers shall wear appropriate protective clothing (clean aprons, hair confinement, face masks, boots, etc.) for their assigned tasks.

Explanation:
The company has a documented protective clothing policy. Appropriate work attire is provided for different areas of work. Clean overalls are provided to all. Hairnets, face masks, boots, gloves, etc. are provided.

Pillar	Reference	Conforming
Food Safety	3.12.8	Yes
Clause and Explanation		

Clause:
Employees shall keep food and drink out of processing, packing and storage areas, and shall not smoke or chew tobacco or gum. This clause also covers the use of e-cigarettes, hallucinogenic or recreational drugs.

Explanation:
Employees are prohibited and prevented on all these personal habits. Physically checked by Designated Supervisors at each location of plant and also at plant entry. PRP’s and SSOP’s are developed and they are covering all the personnel hygiene rules.

Pillar	Reference	Conforming
Food Safety	3.12.9	Yes
Clause and Explanation		

Clause:
Employees shall keep personal items including any personal medication out of processing, packing and storage areas.

Explanation:

Employees are not allowed to carry or keep in possession any personal items in processing or packaging or storage areas. Lockers are provided in change rooms to keep their personal items. PRP’s and SSOP’s are developed and they are covering all the personnel hygiene rules.

Pillar	Reference	Conforming
Food Safety	3.12.10	Yes
Clause and Explanation		

Clause:
The facility shall have a sufficient number of foot baths, foamers or sprayer systems, hand-washing/hand dip and sanitation stations located throughout food production areas. These shall be properly maintained and not easily avoided in order to promote good sanitary practices.

Explanation:
Sufficient hand washing, foot baths, and sanitation stations are located in various areas of the production area, and they are easily accessible for all employees. PRP’s and SSOP’s have been developed, and they cover all the personnel hygiene rules.

Pillar	Reference	Conforming
Food Safety	3.12.11	Yes
Clause and Explanation		

Clause:
The facility shall monitor and enforce employee compliance with proper sanitary procedures, hygiene policies, and the use of sanitation stations described in 3.12.10 Workers shall use hand-washing stations routinely throughout the work period, or as needed to maintain the sanitation levels outlined in the facility SSOPs.

Explanation:
Procedure and requirement for hand washing during work shift is in place. Hands were washed and sanitized once every 1 hr. during production period. This activity is monitored by Supervisor and same has been documented in Chlorination checklist (Pre Processing) (FMT/SOP/24-A) Dt.2024-09-07.

Pillar	Reference	Conforming
Food Safety	3.12.12	Yes
Clause and Explanation		

Clause:
The facility shall provide a sufficient quantity of sanitary supplies (or where culturally applicable, washing facilities), disposable hand towels or other drying mechanism, and soap in employee sanitary facilities. Mechanical air drying shall be tested periodically for microbiological contaminants.

Explanation:

Sufficient hand washing sinks are provided in the change rooms, rest areas and accommodations with adequate liquid Soap dispenser. The facility provided sufficient hand towels to dry the hands after hand washing and mechanical hand dryers provided. The hand dryers are tested for microbial contamination (TPC) on daily basis documented in Register for assessing standards of the unit (FMT/SSOP/017) Dt.2024-10-05.

Pillar	Reference	Conforming
Food Safety	3.12.13	No - Minor
Clause and Explanation		

Clause:
The facility shall monitor sanitary facilities for proper operation and stocking as described in 3.12.12. Facilities shall further ensure employee compliance with proper use of sanitary facilities, including hand washing after toilet use.

Explanation:
The sanitary facilities documented in Maintenance of Toilets (FMT/SSOP/005) dated 2024-10-07 were monitored. It was noted that liquid soap was not present in the hand wash stations in the ladies' dormitory on the 1st floor.

Pillar	Reference	Conforming
Food Safety	3.12.14	Yes
Clause and Explanation		

Clause:
There shall be a documented policy that instructs contractors and visitors on facility sanitation and hygiene policies, including hand washing, control of personal items, and the proper use of protective clothing. They shall be required by the facility to follow these policies.

Explanation:
As observed during the facility inspection, all the contractors and visitors were provided with same protective equipment's as employees based on the area they are visiting in the plant. Health status questionnaire - All visitors (FMT/SOP/099) Dt.2024-07-06 before entering the facility. Same is given for the auditor before entering the food processing area.

Pillar	Reference	Conforming
Food Safety	3.13.1	Yes
Clause and Explanation		

Clause:
Water used in food production areas shall be checked at least every six months by an accredited independent third-party laboratory for microbial and chemical contamination as described in Annex 5. Discharge of retort cooling water shall be monitored internally and by third-party laboratory in accordance with applicable regulations and/or facility HACCP plan.

Explanation:
The facility water is tested by external laboratory as per Annex 5- once in six months reviewed report for water for

chemical & microbiology parameters report No.QEN24080079-01 Dt.2024-08-08 and QEN24020092-01 Dt.2024-02-09 issued by SMS Labs Services Private Limited, Chennai.

Pillar	Reference	Conforming
Food Safety	3.13.2	Yes
Clause and Explanation		

Clause:
Water used in food production areas shall be assured safe and in compliance with USDFA and/or EU standards for microbial and chemical contaminants and disinfection treatments. Routine water quality checks during production days shall be carried out by the facility for residual disinfectant levels (such as chlorine or ozone). These checks shall occur at a minimum daily. The facility shall also test as for the presence of coliforms at minimum every 2 weeks.

Explanation:
Water used in food production areas is potable and complies with EU Directive 2020/2184. Residual chlorine of < 2 ppm is maintained in water used in production to meet EU requirements recorded in Chlorination checklist (FMT/SSOP/46) Dt.2024-10-01. The facility conduct tests for the coliforms once in a week. Records reviewed Register for assessing sanitary standards of the unit (FMT/SSOP/017) Dt.2024-10-04. The facility cleaning their water tanks once in 15 days records reviewed Cleaning schedule & procedure for overhead tank (FMT/SSOP/016) Dt.2024-10-06.

Pillar	Reference	Conforming
Food Safety	3.13.3	Yes
Clause and Explanation		

Clause:
The facility shall prevent water contamination through backflow with proper water supply back flow/back pressure values and proper hose storage.

Explanation:
acility ensures proper hose storage to avoid water contamination. The taps present in processing hall are provided with back flow check valves.

Pillar	Reference	Conforming
Food Safety	3.13.4	Yes
Clause and Explanation		

Clause:
All ice used on product or food production areas in the facility that is purchased from outside sources shall be tested at least every six months by a third-party laboratory accredited to ISO 17025 or equivalent for microbial and chemical contamination as described in Annex 5.

Explanation:

All the Ice used in the facility is generated internally and no Ice is purchased form external sources.

Pillar	Reference	Conforming
Food Safety	3.13.5	Yes
Clause and Explanation		

Clause:
All ice produced by the facility itself using water that complies with clauses 3.12.1 and 3.12.2 shall be tested at least every six months by a third-party laboratory accredited to ISO 17025 or equivalent ONLY for the microbial parameters listed in Annex 5.

Explanation:
All Ice generated internally was from the treated water tested under 3.13.1 and it is tested in external lab once in six months for Microbiological Analysis Report for flake ice Report No.QEN24080079-02 Dt.2024-08-08, Report No.QEN24020092-02 Dt.2024-02-09 for tube ice Report No.QEN24080079-03 Dt.2024-08-08, Report No.QEN24020092-03 Dt.2024-02-09 were seen and they include all the parameters as per the standard.

Pillar	Reference	Conforming
Food Safety	3.13.6	Yes
Clause and Explanation		

Clause:
Ice shall be stored in hygienic and well-maintained areas free of dripping condensation, rust, dirt and other contaminants. Ice shall not be re-used and shall be handled to avoid cross-contamination from utensils, employee garments, storage and transport bins, etc.

Explanation:
Ice is properly stored in clean bins in good condition and the ice handling area is maintained well hygienic and clean. No practice of re-using of ice is observed during audit.

Pillar	Reference	Conforming
Food Safety	3.13.7	Yes
Clause and Explanation		

Clause:
Routine ice quality checks, regardless of source, shall be carried be out by the facility for the presence of coliforms at a minimum, every 2 weeks.

Explanation:
The facility checking for the presence of coliforms once in a week and documented in Register for assessing sanitary standards of the unit (FMT/SSOP/017) Dt.2024-10-04. Also the facility monitoirng on daily basis also recorded in Assessing coliforms in the processing water (FMT/SSOP/017A) Dt.2024-10-06.

Pillar	Reference	Conforming
Food Safety	3.13.8	N/A
Clause and Explanation		

Clause:
Facilities shall have a procedure in place that ensures the safety of air, compressed air, steam, or other gasses used in direct contact with food or as an ingredient in food. The facility shall monitor these items to verify that they do not pose a risk of contamination to food or food contact surfaces.

Explanation:
The facility not using any compressed air, steam or other gasses in direct contact with food.

Pillar	Reference	Conforming
Food Safety	3.14.1	Yes
Clause and Explanation		

Clause:
All chemicals, including cleaners, sanitizers, chlorine, boiler chemicals, etc. shall be approved for use in food plants and used per manufacturer's instructions at recommended safe dosage levels.

Explanation:
A written program is developed for Preparation of Phosphate solution documented in Treatment (Doc No. SOP/06 I07 R00 Dt.2024-06-01 page No.18) and it includes about using only food grade chemicals documented in Additive treatment register (FMT/SOP/027) Dt.2024-10-07. The dosage of chemicals to be used and usage methods have been developed in conjunction with the supplier of the chemicals and Export Inspection Council of India guidelines and also facility different usage levels of chlorine documented in Chlorination checklist (Pre Processing) (FMT/SOP/24-A) Dt.2024-09-07 The facility testing their product for residual phosphate reviewed test report No.QFD24090457-01 Dt.2024-09-18 the result is in compliance.

Pillar	Reference	Conforming
Food Safety	3.14.2	Yes
Clause and Explanation		

Clause:
Monitoring records for all chemicals shall be maintained and readily available. These shall include at minimum the name of the chemical, concentration level, and tests performed to verify the correct concentration.

Explanation:
Chlorination checklist (Pre Processing) (FMT/SOP/24-A) Dt.2024-09-07 is used to monitor the concentration of chlorine used at different stages of the production and sanitation activities. Records for the months of Aug & Sep 2024 were seen.

Pillar	Reference	Conforming
Food Safety	3.15.1	Yes
Clause and Explanation		

Clause:
There shall be no evidence of condensation which has the potential to contaminate product, packaging materials, ingredients or food contact surfaces. Post process retort cooling areas shall be adequately vented to allow for proper cooling and drying.

Explanation:
No condensation observed in the plant.

Pillar	Reference	Conforming
Food Safety	3.16.1	Yes
Clause and Explanation		

Clause:
Procedures shall be in place to ensure raw materials, packaging, cleaners, sanitizers and ingredients are used in the correct inventory rotation order (first in-first out and/or first expiry-first out) and within the allocated shelf life (where applicable).

Explanation:
The procedures are in place to ensure raw material, packaging, cleaning chemicals and ingredients to maintain correct inventory and FIFO/FEFO. For raw material on receipt provided with unique lot code is used for correct inventory rotation order and packaging, cleaning chemicals and ingredients at store first-in, first-out procedure is followed. Stock register contains details of Date of Receiving, Quantity Received, Batch No., Issue Date, Quantity Issued, and Balance in Stock etc. Against each item received as packaging material, ingredient etc., stock register contains details of date of expiry and product issued to production within allocated shelf life for each issued is maintained in Stock Register. Store in charge is responsible for issue of materials. Record reviewed Raw material analysis report and weight note (Rec No.1) Dt.2024-06-06, Stock register (Chlorine) (FMT/SOP/058) Dt.2024-10-04 and Stock register (Liquid Soap) (FMT/SOP/058) Dt.2024-10-03, Stock register (Phosphate) (FMT/SOP/058) Dt.2024-10-07, Stock register (Salt) (FMT/SOP/058) Dt.2024-10-07 was evident was evident. contains records of all incoming materials and issued for production.

Pillar	Reference	Conforming
Food Safety	3.16.2	Yes
Clause and Explanation		

Clause:
Product, ingredients, packaging, and other food contact items such as utensils, baskets, etc. shall be stored off floors, away from walls and covered.

Explanation:
Products are stored off floors on process tables, bins or crates with proper lids kept on SS pallets and away from walls also.

Pillar	Reference	Conforming
Food Safety	3.16.3	Yes
Clause and Explanation		

Clause:
Records for the effective monitoring of frozen storage areas and coolers where products are held shall be documented. Cold storage areas shall be maintained at -18°C or colder with no more than the occasional 3°C fluctuation above -18°C (except during defrost cycles).

Explanation:
Data loggers were used to monitor the temperatures of cold storage and they are well with in the limits. Documented in Date Logger (FMT/GMP/009) Dt.2024-10-07 records reviewed for the month of Aug & Sep 2024.

Pillar	Reference	Conforming
Food Safety	3.16.4	Yes
Clause and Explanation		

Clause:
Raw material and finished product in frozen storage shall be off the floor on pallets. There shall be aisles maintained between pallets and space between pallets and freezer walls to ensure adequate air flow.

Explanation:
Adequate space is maintained between pallets. Products packed in cartons are place on pallets only. Adequate space is also maintained between freezer walls and the packed product in clod stores.

Pillar	Reference	Conforming
Food Safety	3.16.5	Yes
Clause and Explanation		

Clause:
All vehicles, including contracted out vehicles, used for the transportation of raw materials, ingredients, packaging, intermediate/semi processed product and finished product shall be suitable for the purpose, maintained in good repair, at the proper temperature (where applicable) and be cleaned to ensure contamination of the transported goods does not occur. Where temperature control has been applied, it shall be continuously monitored.

Explanation:
The procedure for Vehicles Wash documented in Vehicle wash (Doc. No. SSOP/18 I07 R00 Dt.2024-06-01) and reviewed record Vehicle washing register (FMT/SOP/040) Dt.2024-10-07 and Shipment/Loading Vehicle and temperature record register (FMT/SOP/010) Dt.2024-09-24 and Shipment/Loading Vehicle and Temperature Record Register (FMT/SOP/010) Dt.2024-09-24.

Pillar	Reference	Conforming
Food Safety	3.16.6	Yes
Clause and Explanation		

Clause:
There shall be a written inspection plan for all inbound and outbound goods that include, at minimum, the items listed in 3.15.5. Such checks shall ensure the items and delivery containers meet specifications for safety and quality.

Explanation:
Procedure for Inspection of Raw Material Receiving, ingredients, and packaging material documented in Inspection of Raw Material, Packaging, and Ingredients (Doc No. SOP/20 I07 R00 Dt.2024-06-01) The receipt is in place. Reviewed inspection records Raw material receving and evaluation sheet (FMT/SOP/023) Dt. 2024-10-07; Goods inward note: Ingredients (Phosphate) (FMT/SOP/072) Dt. 2024-09-28; Goods inward note: Packaging (FMT/SOP/072) Dt. 2024-09-25; and COA reviewed COA No.QFD24100076-01 Dt. 2024-10-07 for Phosphate Batch No. 24018166 issued by SMS Labs Services Private Limited, Chennai The facility was using Salt Batch No. SN076 at the time of the audit, and no test certificate of analysis was available to confirm it's meeting the specifications.

Pillar	Reference	Conforming
Food Safety	3.17.1	Yes
Clause and Explanation		

Clause:
The facility premises, equipment, procedures and flow shall be designed, constructed and maintained to prevent the risk of contamination or allergen cross contact to food and food contact surfaces and ingredients.

Explanation:
Plant is designed, constructed and maintained well for proper raw material receiving, process flow, packaging, storage & shipment, waste handling, employee control in plant facility on compulsory sanitation controls etc., to control risk of product contamination. Plant is designed in such a way that the product flow is uni-directional, this will ensure no cross contamination is happened.

Pillar	Reference	Conforming
Food Safety	3.17.2	N/A
Clause and Explanation		

Clause:
Raw product areas shall be physically separated from ready-to-eat product by a non-permeable barrier with self-closing doors to ensure contaminants are not transferred into sensitive areas.

Explanation:
The facility producing only raw products.

Pillar	Reference	Conforming
Food Safety	3.17.3	N/A
Clause and Explanation		

Clause:
All items used in ready-to-eat (RTE) areas (e.g. bins, crates, utensils, ingredients, ice, etc.) shall be kept separate from those used in raw areas. Such items shall be readily identifiable as for RTE areas through color coding, labelling, or other effective means. There shall be an effective validation procedure and sanitation procedure in place for items used in raw areas prior to use in RTE areas. Such procedures shall be monitored daily.

Explanation:
The facility producing only raw products.

Pillar	Reference	Conforming
Food Safety	3.17.4	N/A
Clause and Explanation		

Clause:
All employees working in RTE areas, or moving from raw to RTE, shall be required to change into RTE-wear free of contamination in a designated changing room.

Explanation:
The facility producing only raw products.

Pillar	Reference	Conforming
Food Safety	3.17.5	N/A
Clause and Explanation		

Clause:
Process water shall adequately drain away from high-risk areas (cooking and ready-to-eat) to lower-risk areas where raw product is maintained.

Explanation:
The facility producing only raw products.

Pillar	Reference	Conforming
Food Safety	3.17.6	N/A
Clause and Explanation		

Clause:
There shall be positive air flow and circulation from high risk areas to low risk areas. (To prevent cross-contamination in areas where raw product is in the proximity of ready-to-eat and cooked product).

Explanation:
The facility producing only raw products.

Pillar	Reference	Conforming
Food Safety	3.17.7	Yes
Clause and Explanation		

Clause:
Cleaning and sanitizing activities shall not occur where exposed product, packaging, ingredients or utensils are nearby to prevent cross-contamination.

Explanation:
Products are stored in closed bins / crates with intact lids kept on SS pallets during floor washing and sanitation to prevent any contamination.

Pillar	Reference	Conforming
Food Safety	3.17.8	N/A
Clause and Explanation		

Clause:
All products in chilled and/or frozen storage shall be kept in protective sealed cartons. Ready-to-eat and raw products shall be kept separated from one another within the storage area. The facility shall maintain ambient refrigerated and/or freezer temperatures that inhibit bacterial growth, pathogen growth, and/or toxin development.

Explanation:
The facility producing only raw products.

Pillar	Reference	Conforming
Food Safety	3.17.9	Yes
Clause and Explanation		

Clause:
There shall be effective procedures in place to prevent cross-contamination and cross contact between allergen and non-allergen products, ingredients, utensils, and workers throughout receipt, storage, handling and use. Such procedures shall also be in place to prevent cross-contamination between ingredients or products with different allergens. These measures shall include physical separation, color-coding, labeling, time separation, or other effective means.

Explanation:

Allergen Policy was documented in Allergen Control Program (Doc No.SOP/27 I07 R00 Dt.2024-06-01 page No.72) is evident and it addresses details like cleaning of lines after the production of allergen containing products. Allergens handled at site are only shrimp and they are part of all the product. labelling is identified as CCP to inform consumers about allergen containing products.

Pillar	Reference	Conforming
Food Safety	3.18.1	Yes
Clause and Explanation		

Clause:
There shall be a written program for the use of food additives or chemicals. Such as sulfites, color additives, phosphates, phosphate blends or other moisture retention agents. The facility shall also verify that these items are food grade and used in compliance with legal, customer, and manufacturer's requirements. Facilities shall document that the combination used do not create hazards.

Explanation:
The usage of phosphate and salt was documented in Preparation of Phosphate solution documented in Treatment (Doc No. SOP/06 I07 R00 Dt.2024-06-01 page No.18) and it includes about using only food grade chemicals documented in Additive treatment register (FMT/SOP/027) Dt.2024-10-07.

Pillar	Reference	Conforming
Food Safety	3.18.2	Yes
Clause and Explanation		

Clause:
The facility shall conduct microbiological testing on finished product lots for bacterial pathogens for the parameters and frequency as required by local and country of export legislations and customer specifications. Note: Both primary (first) processors and secondary (value added processors receiving from a primary plant) are required to comply with this testing requirement.

Explanation:
All the lot codes were tested for microbiological parameters at internally and all the samples were analysed and results were recorded for Analysis of Total Plate count, Escherichia coli and Staphylococcus aureus (FMT/SOP/034) Dt.2024-10-06, Analysis of Salmonella (FMT/SOP/035) Dt.2024-10-08, Analysis of Vibrio cholerae (FMT/SOP/035) Dt.2024-10-06, Identification of Vibrio parahaemolyticus (FMT/SOP/035) Dt.2024-10-06. Test results were reviewed are meeting the requirements of Table II of Annex 4. Test methods used were also matching Table II Annex 4, they are using BAM methods. The internal lab is not ISO 17025 accreditated and the lab is participating in proficiency testing reviewed record Proficiency Test Report (FMT/SOP/93) Dt.2024-07-30.

Pillar	Reference	Conforming
Food Safety	4.1.1	Yes
Clause and Explanation		

Clause:
The facility shall document and implement appropriate Product Release Procedures that identify processes and testing procedures that shall be performed. These Procedures shall identify the responsible person or persons authorized to release product and include food safety, quality and legal specifications that shall be verified as having been met prior to release.

Explanation:
Product on hold and release procedure documented in Product Release Policy (Doc No. SOP/25 I07 R00 Dt.2024-06-01 page No.70) is addressing all the requirements. Reviewed Product Release (FMT/SOP/032B) Dt.2024-09-30. The responsible person for authorized to release the product by Manager QA.

Pillar	Reference	Conforming
Food Safety	4.2.1	Yes
Clause and Explanation		

Clause:
The facility shall have an internal audit system in place that requires self-assessment of the facility's performance against the full scope of the SPS Standard, including its Annexes.

Explanation:
The internal audit procedure was documented in Internal Audits (Doc No. SOP/15 I07 R00 Dt.2024-06-01) and Internal Audit Matrix for the year 2024 (FMT/SOP/067A) Dt.2024-07-01 were seen and they include the detail as required by the standard.

Pillar	Reference	Conforming
Food Safety	4.2.2	No - Minor
Clause and Explanation		

Clause:
The facility's internal auditors shall be trained and competent to conduct internal audits. and the facility shall have a provision against internal auditors auditing their own departments or functions.

Explanation:
The list of internal auditors is documented in the List of Internal Auditors (FMT/SOP/49/01). The facility has 13 internal auditors who are currently conducting internal audits. Three of the internal auditors are undergoing external training on internal audit, and seven internal auditors were trained internally by Mr. V. Bhagavan on January 1, 2024. Their external training certificate on internal audit, conducted by BRCGS on August 31, 2020, was also reviewed. The internal auditors operate independently from the auditing department. However, there are no available internal training records for three internal auditors: Mr. G.C. Hareesh, Ms. G. Veni, and Ms. M. Sravani and internal audit on Food defense (FMT/SOP/43A) Dt.2024-05-29, auditor is HR Manager who is not independent from the auditing department.

Pillar	Reference	Conforming
Food Safety	4.2.3	Yes

Clause and Explanation

Clause:
Records of the Internal Audits shall be maintained. Records shall reflect results of the internal audit, including conformity and non-conformity. Where non-conformities are found, records shall document corrective actions and time frame for completion for each.

Explanation:
Reviewed internal audit record for internal audit conducted on HACCP (FMT/SOP/43A) Dt.2024-03-04 auditor is Senior Manager QA (from their another unit) and internal audit on Food defense (FMT/SOP/43A) Dt.2024-05-29. Corrective actions taken for all the nonconformity found were recorded in Corrective action and Non conformance Record (FMT/SOP/70) Dt.2024-09-29 . Reviewed record the floor found be broken in chill room No.1 and proper corrective action, preventive actions were initiated are meeting the standard requirement.

Pillar	Reference	Conforming
Food Safety	4.2.4	Yes
Clause and Explanation		

Clause:
The internal audit frequency within the facility and its departments shall be determined by risk assessment and shall be carried out annually at a minimum.

Explanation:
All the topics were covered at least annually and it is as per the Internal audit matrix for the year (2024) (FMT/SOP/067A) Dt.2024-07-01.

Pillar	Reference	Conforming
Food Safety	4.3.1	Yes
Clause and Explanation		

Clause:
Process-monitoring instruments critical to food safety and legality shall be calibrated, or tested for accuracy, internally (i.e. by the facility in house). Such instruments would include thermometers, pH meters, salinity meters, metal detectors, or other items that monitor CCPs.

Explanation:
The procedure for Calibration of Equipments was documented in Calibration of Electronic Balance, Thermometers, pressure guages, metal detectors (Doc No. SOP/08 I07 R00 Dt.2024-06-01). Auditor reviewed a External Calibration (FMT/SOP/008B) Dt.2023-08-28 were seen and they include all the equipment critical to product safety. All the critical equipment were calibrated externally once every year by Rasci INstruments, Chennai were seen for Digital Temperature indicator belongs to IQF line ID No.B37216218 Certificate No. RI/CERT/0824/279-13 Dt.2024-08-23 and valid till 2025-08-22, Electronic Balance with serial No.DS45121342557 reviewed certificate No.B94169 calibrated on Dt.2024-05-22 and valid till 2025-05-21 calibration was done by Office of the legal metrology, Vijayawada, Government of Andhra Pradesh and Metal detector with serial number B212793700 Dt.2024-08-14 valid till Dt.2025-08-13.

Pillar	Reference	Conforming
Food Safety	4.3.2	Yes
Clause and Explanation		

Clause:
The facility shall maintain a documented calibration/accuracy check schedule that identifies all measuring and monitoring devices referred to in 4.3.1 and 4.3.5. The schedule shall identify each item, calibration date, scheduled frequency, recognized method or standard calibrated to, the source of the method or standard, and the party that performed the calibration.

Explanation:
External Calibration (FMT/SOP/008B) Dt.2023-08-28. The calibration is carried out in external lab an ISO 9001-2015 & ISO 17025 certified, Rasci Instruments, Chennai certificate No.CC-2823 Dt.2023-10-08 valid till Dt.2025-10-07. Detail of calibration traceability is evident on calibration certificates and they are traceable to national standards as below and valid for one year from date of calibration. The master list addressed to the requirement.

Pillar	Reference	Conforming
Food Safety	4.3.3	Yes
Clause and Explanation		

Clause:
The process monitoring instruments critical to food safety and legality referred to in 4.3.1 shall be calibrated or tested/checked for accuracy in-house at an adequate frequency and shall include an annual validation study of the functioning of the instruments under normal plant operating conditions.

Explanation:
The facility calibrated internally for Checklist for Metal Contamination, Calibration of Metal Detector IQF (FMT/SOP/031) Dt. 2024-10-07 for every 60 min, Internal calibration record for electronic balances (FMT/SSOP/008) Dt.2024-10-07, Thermometer calibration report (FMT/SOP/08A) Dt.2024-10-07.

Pillar	Reference	Conforming
Food Safety	4.3.4	N/A
Clause and Explanation		

Clause:
Low Acid Canned Foods (LACFs) process controls (including heat distribution, heat penetration, post process validation, scheduled processes) shall be conducted on a pre-determined frequency by a recognized Processing Authority or other regulatory approved alternative method.

Explanation:
No Low Acid Canned Foods produced.

Pillar	Reference	Conforming
Food Safety	4.3.5	Yes
Clause and Explanation		

Clause:
The facility shall ensure that all measuring and monitoring devices critical to food safety referred to in clause 4.3.1 are externally calibrated at least annually by a qualified third-party and are traceable to a recognized standard.

Explanation:
The calibration is carried out in external lab an ISO 9001-2015 & ISO 17025 certified, Rasci Instruments, Chennai the certificate No. No.CC-2823 Dt.2023-10-08 valid till Dt.2025-10-07.

Pillar	Reference	Conforming
Food Safety	4.4.1	Yes
Clause and Explanation		

Clause:
The facility shall prepare a written sampling plan that details frequency and type of product testing. This sampling plan shall comply with the GSA testing requirements for antibiotics, microbial contaminants, and chemical additives described throughout the Standard and its Annexes. This sampling plan shall also incorporate any testing beyond GSA that are required by the local or country of export buyers or regulatory authorities.

Explanation:
Sampling Scale for Product testing was documented in Sampling and testing (Doc No. SOP/23 I07 R00 Dt.2024-06-01 page No.65) and compared to sampling requirements of Export countries and local regulations. These documents generally meeting the compared requirements. Product testing is done.

Pillar	Reference	Conforming
Food Safety	4.5.1	Yes
Clause and Explanation		

Clause:
The facility shall prepare and implement a system to ensure that all product and ingredient testing and analysis critical to food safety are conducted to ISO 17025 or equivalent (i.e. the "General Requirements for the Competence of Testing and Calibration Laboratories"). This applies to both internal labs and external third-party labs.

Explanation:
Facility is testing all the lots of Finished Product as per requirements of customers and legal requirements of export countries in ISO 17025 approved laboratories like laboratory testing is done with SMS Labs Services Private Limited, NABL certificates Certificate No. TC-6118 issue Dt.2024-09-07 valid till 2026-09-06 and Vimta Labs Ltd., Visakhapatnam, NABL certificate No.TC- 5374 Dt.2022-03-27 valid till Dt. 2024-03-26, finished product transportation, contract with Merlyn Shipping Transports,Visakhapatnam Dt. 2023-01-01 valid till Dt.2023-12-31. The external laboratory is accredited by NABL, certificates of accreditation were on file. The internal lab is not ISO 17025 accreditation and the lab is participating in proficiency testing.

Pillar	Reference	Conforming
Food Safety	4.5.2	Yes
Clause and Explanation		

Clause:
Records of third-party laboratory testing, testing methods, and the accreditations or approvals they have, shall be maintained. (Refer to Annex 4).

Refer to clause no. 4.5.1.

Pillar	Reference	Conforming
Social Accountability	5.1.1	Yes
Clause and Explanation		

Clause:
Facilities shall operate in compliance with this standard and all local, national, and international conventions, rules and regulations, whichever provides the highest protection to the worker. The facility shall have in place policies and procedures pertaining to, but not limited to: worker health and safety and compliance with requirements regarding wages, benefits, hours, hiring practices, minimum age, status of workers, and good employee relations that provide the highest protection to the workers.

Explanation:
Facility adopted different policies as per Section 3 of the Industrial Employment Act, 1946 and Rule 5 of Industrial Employment Act Rules , 1953. These policies covering all the local, national and international laws, rules and regulations. Facility developed a Social Compliance Manual to cover different policies and procedures pertaining to worker health and safety and compliance with requirements regarding wages, benefits, hours, hiring practices, minimum age, status of workers, and good employee relations. The Factory is having different policy such as Employment particulars - Child labour policy and remediation for child labour (Doc No. 10 R I01 R00 Dt.2024-01-03), Anti Bribery and Anti corruption policy and procedure (Doc No. 09 I01 R00 Dt.2024-01-03), Anti Discrimination (Doc No. 40 I01 R00 Dt.2024-01-03), Working hours documented in Time reporting policy (Doc No.29 I01 R00 Dt.2024-01-03), Wage and salary policy and deduction from wages or salaries policy (Doc No. 30 I01 R00 Dt.2024-01-03), Leave policy (Doc No. 31 I01 R00 Dt.2024-01-03), Disciplinary policy (Doc No. 41 I01 R00 Dt.2024-01-03), Freedom of Association and collective bargaining (Doc No. 46 I01 R00 Dt.2024-01-03), Grievance Redressal Policy Procedure (Doc No.36 I01 R00 Dt.2024-01-03); Work place health and safety policy and procedure (Doc No.63 I01 R00 Dt.2024-01-03)
Works committee meetings are conducted once in a month. Last meetings have been conducted on Dt.2024-09-05. There are 05 management representatives and 05 worker representatives Ms. Myla Sitha (Processing worker), Ms. Arajampudi Sujatha (Processing worker), Mr. Rekadi Siva Sankara Prasad (Processing worker), Ms. Mandapalli Sumathi (Processing worker) and Ms. Marada Kumari (Processing worker) are the worker representatives. Worker representative have been elected on Dt.2024-11-21. Grievances handling committee hasa been conducted once in 3 months. Last meeting have been conducted on Dt.2024-09-28 and Dt.2024-05-23.

Pillar	Reference	Conforming
Social Accountability	5.1.2	Yes

Clause and Explanation

Clause:
Facilities shall comply with all applicable anti-bribery laws and not participate in any act of corruption, extortion, embezzlement, or any form of bribery – either directly or indirectly.

Explanation:
The facility having a policy on anti bribery laws and complying with the policy.

Pillar	Reference	Conforming
Social Accountability	5.2.1	Yes
Clause and Explanation		

Clause:
The facility shall ensure that workers are paid at least the legal minimum wage, or the wage rate established by an employment contract or collective bargaining agreement, whichever is higher. Regular wages and compensation shall cover the workers' basic expenses and allow for some discretionary funds for use by workers and their families.

Explanation:
Yes as per Government Notification Minimum Wages G.O.Ms. No.93, LET&F (Lab.II) Dept., Dt.28.09.2007 published in Gazette No.J/3432179/2020 Dt.2020-05-07 Minimum Wages and VDA Payable from 01.04.2024 to 30.09.2024 and a press note released by state government were seen. As per the G.O the VDA payable is Rs. 7,915.00 per month per employee. It has been calculated from 1812 CPI points (Consumer Price Index) - 525 (CPI Points) = 1287 VDA points (Variable Dearness Allowance) X Rs. 6.15. As per this facility need to pay as follows - Machine Operator Rs. 4,153.00 + Rs. 7,915.00 = 12,364.00; Process worker and Grader Rs. 4,362.00 + Rs. 7,915.00 = Rs. 12,277.00; Loader and unloader Rs. 3,959.00 + Rs. 7,9150 = Rs. 11,874.00; Packer Rs. 3,751.00+ Rs. 7,915.00 = Rs. 11,666.00 and Security guard Rs. 3,555.00 + Rs. 7,915.00 = Rs. 11,470.00. Verified the time cards and wage slips of 10 employees for the months of Aug 2024(Random month), Sep 2024 (Peak season). Examples of the wages slips verified for Sep 2024 are - Ms. Kelli Seetharatnam (DFL 641) (Peeling & Deveining - 26 days - Total paid was Rs. 12,800.00; EPF - Rs. 1473.00 and ESI - Rs. 96.00; Net Paid was Rs. 9,731.00); Ms. Kandapalli Sanjana (1247) (Peeling & Deveining - 27 days - Total paid was Rs. 13,282.00; EPF - Rs. 1530.00; ESI - Rs. 100.00; Net paid - Rs. 10,092.00), Mr. Bisraba Mallick (DFL 453) (Processing boy - 24 days - Total paid was Rs. 14,040.00; EPF - Rs. 1360.00; ESI - Rs. 106.00; Net paid - Rs. 11,194.00) and Mr. Ranjan Rana (466) (Cold Store worker - 27 days - Total paid was Rs. 17,768.00; EPF - Rs. 1530.00; ESI - Rs. 134.00; Professional tax - Rs.150.00, Net paid - Rs. 14,394.00). Bonus has been calculated at 8.33% for all the employees. Reviewed Form C - Bonus Paid to the employees for the accounting year 2022-23 Dt.2023-10-18. The facility has got a policy of carrying forward 15 days of earned leave to the next year and pay for the balance of the earned leave on along with the bonus every year.

Pillar	Reference	Conforming
Social Accountability	5.2.2	Yes
Clause and Explanation		

Clause:
The facility shall provide benefits that, at minimum, are required by local or national law (such as paid holidays, maternity leave, health insurance, paid sick time, etc., as applicable).

Explanation:
There is a policy on on working hours and payment of wages which also covers the holidays and its payments. At present the facility provides a weekly off for all the employees, for office staff it is on Sunday and for shop floor workers and

security its on a rotational basis. The facility provides 12 days of casual leave, 12 days of sick leave, 6 months of maternity leave for all the employees. As per the national and festival holidays list, there are 4 national and 6 festival & other holidays provided. The facility also provides leave with wages as per law (1 day for every 20 days of working). Facility has covered all the applicable employees under the ESI. Confirmed the same during the interview with the workers.

Pillar	Reference	Conforming
Social Accountability	5.2.3	Yes
Clause and Explanation		

Clause:
The facility shall compensate workers for overtime hours worked beyond the nationally mandated regular work week, at a premium rate, as required by local law.

Explanation:
Overtime Policy has been documented in Social requirements (Doc No.06 I01 R00 Dt.2024-01-03 page No.2). Over time work is voluntary. During interview it was confirmed that no employees have worked overtime ever since the starting of their employment. Verified the time records, production records and overtime records of 10 employees and found that there is no overtime work performed. As per the policy the allowed overtime is 2 hours a day, 12 hours a week and 50 hours in a quarter of a year. Verified wage slips for Aug 2024 are - Ms. Kelli Seetharatnam (DFL 641) (Peeling & Deveining - 26 days - Total paid was Rs. 12,800.00; EPF - Rs. 1473.00 and ESI - Rs. 96.00; Net Paid was Rs. 9,731.00); Ms. Kandapalli Sanjana (1247) (Peeling & Deveining - 27 days - Total paid was Rs. 13,282.00; EPF - Rs. 1530.00; ESI - Rs. 100.00; Net paid - Rs. 10,092.00), Mr. Bisraba Mallick (DFL 453) (Processing boy - 24 days - Total paid was Rs. 14,040.00; EPF - Rs. 1360.00; ESI - Rs. 106.00; Net paid - Rs. 11,194.00) and Mr. Ranjan Rana (466) (Cold Store worker - 27 days - Total paid was Rs. 17,768.00; EPF - Rs. 1530.00; ESI - Rs. 134.00; Professional tax - Rs.150.00, Net paid - Rs. 14,394.00). Sewage from the facility shall be adequately controlled to avoid contamination of the environment, food production areas, employee rest and housing areas, and water supply. It shall be properly treated through a municipal or plant sewer system.

Explanation:
The plant sewage is adequately controlled in a septic tank located in one remote corner of the plant to prevent any possible contamination. A sewage treatment plant is under construction for the workers' dormitory as the dormitory itself is being under construction.

Pillar	Reference	Conforming
Environmental	7.2.2	Yes
Clause and Explanation		

Clause:
Solid waste, waste water in plant production areas and on the plant grounds shall be properly stored and disposed of according to local laws and regulations. (This includes processing by-products such as heads, shells, bones, viscera, etc.,

and used packing materials). Such waste shall be disposed of to avoid negative impacts on the community and according to national environmental standards.

Explanation:
The processing by product waste (shrimp shell) properly stored in a waste disposal room in polythene bags and the bags were closed properly. The Solid Waste is lifted from the plant is for product waste generated from the process having a contract with M/s. Balaji aqua and poultry feed LLP., Samisragudem village, Nidadavolu Mandal, West godavari district Dt.2024-08-01 valid till 2025-07-31 Pollution control board consent order No.1206-APPCB/ROELR/CFO/2020 Dt.2020-03-21 valid till Dt.2030-02-28, and it is legally approved as per national environmental standards, record reviewed Offal collection record (FMT/SOP/026) Dt. 2024-10-07 and Packing material waste disposal record (FMT/SOP/151) Dt.2024-09-20.

Pillar	Reference	Conforming
Environmental	7.2.3	Yes
Clause and Explanation		

Clause:
Used chemical and fuel containers, waste oil, lubricants, and expired chemicals and ingredients shall be disposed of in accordance with manufacturer's instructions and local government environmental regulations. The facility shall maintain copies of relevant and up-to-date regulations.

Explanation:
Used chemical and fuel containers were recycled by sending back to suppliers. Waste oil and waste lubricants were lifted by a third party contractor Waste Oil taken by M/s. SAF Petroleum, Sarpavaram, Kakinada Dt.2024-08-01 valid till 2025-07-31 consent order No.5916/APPCB/ZOVSP/ KKD/CFO/2018-309 Dt.2018-05-31 valid till Dt.2028-05-31. Reviewed Waste oil management log book (FMT/SOP/101J) Dt.2024-09-10.

Pillar	Reference	Conforming
Environmental	7.2.4	Yes
Clause and Explanation		

Clause:
Facility personnel responsible for storage, transport and disposal of the items listed in 7.2.2 and 7.2.3 shall be appropriately trained to prevent personnel and food safety hazards as well as potential environmental contamination.

Explanation:
Personnel responsible for handling disposal of items mentioned 4.2.2 & 4.2.3 were trained on Handle, spill and leakages of chemicals and their risks as well as all material handling methods training has been conducted on Dt.2024-09-20 conducted by JK Fire and safety services.

Pillar	Reference	Conforming
Environmental	7.2.5	Yes
Clause and Explanation		

Clause:
Where the local government requires a license or permit for the waste storage and disposal activities described in 7.2.2 and 7.2.3, the facility shall have a current copy of the plant's or their service provider's permit or license.

Explanation:
Refer to 7.2.2 & 7.2.3 for more details.

Pillar	Reference	Conforming
Animal Welfare	8.1.1	N/A
Clause and Explanation		

Clause:
Animals shall be transported to processing plants or other markets in a manner that assures a high level of animal welfare and minimizes distress.

Explanation:
The facility procured chilled killed farm raised shrimps from the pond in ice crates and transported by a insulated vehicle and maintain the temperature of the product less than 4 degree Celsius up to receiving in process plant.

Pillar	Reference	Conforming
Animal Welfare	8.1.2	N/A
Clause and Explanation		

Clause:
If animals are hauled live to a processing plant, transport must be implemented without undue delay, and the time and stocking density controlled to provide optimum survival and product quality. These shall include, where necessary, adequate clean water, dissolved oxygen levels and temperature control.

Explanation:
No live haul transportation practiced.

Pillar	Reference	Conforming
Animal Welfare	8.1.3	N/A
Clause and Explanation		

Clause:
Adequate dissolved oxygen levels shall be maintained. Transport density shall be determined by local conditions, these transport provisions shall apply equally to all suppliers, plant employees and subcontractors.

Explanation:
No live haul transportation practiced.

Pillar	Reference	Conforming
Animal Welfare	8.2.1	N/A
Clause and Explanation		

Clause:
If animals are held live at processing plants prior to slaughter holding conditions shall be operated to assure adequate animal welfare. These shall include, where necessary, adequate clean water, dissolved oxygen levels and temperature control.

Explanation:
The shrimp is not in live condition during processing.

Pillar	Reference	Conforming
Animal Welfare	8.3.1	N/A
Clause and Explanation		

Clause:
If animals are slaughtered at the processing facility, before slaughter, they shall be quickly rendered unconscious by humane means.

Explanation:
The facility receiving chilled raw material with ice packed from the farm. The facility doesn't receive the live shrimp.

Pillar	Reference	Conforming
Traceability	9.1.1	N/A
Clause and Explanation		

Clause:
Facilities that source raw material from both wild-caught and farm-raised sources shall properly identify, segregate and label products from different wild-caught and/or aquaculture sources and shall indicate any relevant certifications.

Explanation:
The facility process only raw material from farm raised sources.

Pillar	Reference	Conforming
Traceability	9.1.2	N/A

Clause and Explanation

Clause:
Proper identification shall be maintained for each lot, for each wild-caught and farm-raised source, on all documents and at each step of the process flow from raw material receiving, handling, processing, packaging, storage and dispatch. Records shall be maintained to ensure product identity and demonstrate that products from wild-caught and aquaculture sources and those from certified and non-certified sources are not mixed.

Explanation:
The facility process only raw material from farm raised sources.

Pillar	Reference	Conforming
Traceability	9.1.3	N/A
Clause and Explanation		

Clause:
For facilities that produce both wild-caught and farm-raised species, procedures shall ensure that wild-caught certified and farm-raised certified products were not compromised through mixing or substitution with non-certified wild caught product or non-certified farm-raised products, or through mixing of product of different BAP star categories.

Explanation:
The facility process only raw material from farm raised sources.

Pillar	Reference	Conforming
Traceability	9.1.4	N/A
Clause and Explanation		

Clause:
The procedures and records shall clearly show controls and traceability at ALL steps: chain of custody evidence from the outsourced entity (country of origin, for example), on the way to the outsourced entity, during handling, production, labelling or storage at the outsourced entity, and during transport away from the outsourced entity back to the facility.

Explanation:
The facility is not outsourcing any processes.

Pillar	Reference	Conforming
Traceability	9.2.1	Yes
Clause and Explanation		

Clause:
The facility shall develop, maintain and document appropriate traceability procedures and systems to include identification

of batches of raw material, ingredients, in-process products, rework, outsourced processing, packaging, additives, and final product throughout the production process and any out-sourced product, ingredient or service.

Explanation:
Traceability was documented in Procedure for Traceability (Doc No. SOP/40 I07 R00 Dt.2024-06-01 page No.117) were developed to address product identification and Traceability through out the process. Batch codes and quantities used were clearly recorded on all in process records as observed during site tour during the audit, like batch no's. In house Traceability and Mass Balance (FMT/SOP/77) used for recording all the quantities and batch no's. of ingredients, packing material and shrimps used in the production. Facility out sourced the services like pest control, transportation, waste collection etc., which are mostly PRP's and they can track these services by using records. No products or ingredients were outsourced.

Pillar	Reference	Conforming
Traceability	9.2.2	Yes
Clause and Explanation		

Clause:
The facility shall operate a traceability record-keeping process that provides timely, organized, accurate entries, performed and overseen by a designated trained person or traceability team responsible for collecting the data, ensuring it is complete and accurate, and that traceability requirements are met.

Explanation:
Manager QA is responsible for Traceability documentation and he verifies it once in 6 months by conducting random Trace Forward and Back ward exercises documented in Raw material to Finished Product Traceability and Finished Product to Raw material Traceability last traceability test conducted on Dt.2024-06-20 Raw Vannamei Peeled Deveined Tail off shrimp IQF production code 4A20, Size 61/70 - 600 cartons packing 10 X 2 Lbs. facility achieved 100% traceability. Same is also verified on the day of audit by conducting 1 trace forward and 3 trace back exercises on Product code 4H09 B.No.ACV-AP045679/002 (Trace forward), 4G27 B.No.ADF-AP050252/003 (Trace back), 4F25 B.No.RRV-AP031888/013 (Trace back), 4E28 B.No.SKS-AP026322/0013 (Trace back).

Pillar	Reference	Conforming
Traceability	9.2.3	Yes
Clause and Explanation		

Clause:
Where a facility’s traceability system consists of paper records, separate documents, forms, notebooks and/or files, this information shall be transferred to a computer database or spreadsheet to allow for transmission and verification of electronic data.

Explanation:
All the documents used for transferring data on to spread sheet were maintained, documents of lot no's.1 trace forward and 3 trace back exercises on Product code 4H09 B.No.ACV-AP045679/002 (Trace forward), 4G27 B.No.ADF-AP050252/003 (Trace back), 4F25 B.No.RRV-AP031888/013 (Trace back), 4E28 B.No.SKS-AP026322/0013 (Trace back) is compared to spread sheet and it is matching.

Pillar	Reference	Conforming

Traceability	9.2.4	Yes
Clause and Explanation		

Clause:
Where a facility's traceability system uses an online system or computer database, the facility shall keep copies of the documents or records that were used to transfer data to the electronic system in order to allow verification of the information in the electronic system.

Explanation:
All the documents used for transferring data on to spread sheet were maintained, documents of lot no's. 1 trace forward and 3 trace back exercises on Product code 4H09 B.No.ACV-AP045679/002 (Trace forward), 4G27 B.No.ADF-AP050252/003 (Trace back), 4F25 B.No.RRV-AP031888/013 (Trace back), 4E28 B.No.SKS-AP026322/0013 (Trace back) is compared to spread sheet and it is matching.

Pillar	Reference	Conforming
Traceability	9.3.1	N/A
Clause and Explanation		

Clause:
Wild-Caught Raw Material – The facility shall keep an up-to-date traceability records of all wild-caught raw material suppliers, including but not limited to:
o Supplier name and address including country
o Common or commercial name and species name
o Date of deliveries and lot numbers
o Input tonnage and total net weight produced for mass balance calculation
o Quantity supplied by each supplier
o Product form at time of landing
o Date harvested (process date or date code)
o Date landed
o FAO statistical area of harvest
o Country of first landing
o Country of origin
o Name of entity to which the fish was first landed or delivered including: name, telephone, and email address of contact person
o Name of the flag of the harvesting vessel
o Vessel(s) permit of license number
o Unique vessel identifier (such as vessel name or registration number)
o Specific type of fishing gear used for harvesting
o Current GSSI recognized certificate (required for BSP logo use on packaging)

Explanation:
The facility not producing any wild caught material.

Pillar	Reference	Conforming
Traceability	9.3.2	Yes
Clause and Explanation		

Clause:

Farm-Raised Raw Material- Facilities shall maintain documented farm data for all farm deliveries received from all BAP certified and non-certified farm suppliers to include the below information, as applicable:
o Farm supplier name
o BAP farm certification number
o Production method (pond, cages, reservoir, etc.)
o Identification of production unit
o Sources of post larvae/stocking material
o Date of deliveries and lot numbers (one pond or culture unit on a single day)
o Unit of measure and total net weight for mass balance
o Movement document number (if relevant)
o Feed use (type and lot numbers)
o Reports of chemical treatments
o Testing data for the presence of microbes, antibiotics and chemicals in product

Explanation:
All the details were included in Supplier Guarantee & Shrimp Farmer Declaration. Records for raw material supplied for the lot No. 4H09 B.No.ACV-AP045679/002 is seen and below are the details captured.
Farm supplier name - Chundru Veerraju, Farm Reg No. AP045679/002, AP Trayam, East Godavari District, Andhra Pradesh.
BAP farm certification number - N/A.
Production method (pond, cages, reservoir, etc.) - Ponds
Identification of production unit - 4H09 B.No.ACV-AP045679/002 - Dt. 2024-08-09
Sources of post larvae/stocking material - H10049.
Date of deliveries and lot numbers (one pond or culture unit on a single day) - 4H09 B.No.ACV-AP045679/002 - Dt. 2024-08-09
Unit of measure and total net weight for mass balance - 4,989.600 Kg's
Movement document number (if relevant) - Weighment slip No.888 Dt.2024-08-09
Feed use (type and lot numbers) - M10179.
Reports of chemical treatments - No chemicals used for treatment
Testing data for the presence of microbes, antibiotics and chemicals in product - Internal test reports for Microbes, Sulphates & Antibiotics up on arrival at factory.

Pillar	Reference	Conforming
Traceability	9.3.3	Yes
Clause and Explanation		

Clause:
Ingredients/Packaging Materials - Facilities shall maintain complete data for all materials used in the product (including packaging, ingredients, chemical additives) from approved suppliers to include the below information, as applicable:
o Supplier name and address
o Facility invoice number and/or purchase order number
o Receiving date, quantity and lot number
o Full description of the item (ex: 3 mm poly film, sodium tripolyphosphate, batter, breading)
o All label information including ingredients in, for example, the batter or breading where applicable
o Lot number assigned by the facility when receiving in (if different from receiving lot number)
o Storage location

Explanation:
All the details about packing material and ingredients is captured in Traceability Record and records of packing material and ingredients used in production of lot no. 4H09 B.No.ACV-AP045679/002 - Dt. 2024-08-09 is seen and below are the details.
Supplier name - M/s. Pragati Print Pack, Visakhapatnam (B.No. OB/PP/222), M/s.Coromandal Cartons Pvt. Ltd. (B. No.OB/MC/222D). Facility invoice number and/or purchase order number - Master Carton (Invoice No.CP/24-25/0691 Dt.2024-08-05 & Pouch Invoice No. PPP/24-25/04570 Dt.2024-08-02.
Full description of the item (ex: 3 mm poly film, sodium tri poly phosphate, batter, breading) - 5 ply corrugated boxes & Laminated Pouch.
All label information including ingredients in, for example, the batter or breading where applicable - N.A

Lot number assigned by the facility when receiving in (if different from receiving lot number) - N.A
Storage location -Bulk Packing Material Store.

Pillar	Reference	Conforming
Traceability	9.3.4	Yes
Clause and Explanation		

Clause:
Finished Product - Facilities shall have a system in place that ensures up-to-date, and easily accessible, data of all wild-caught and farm-raised raw material suppliers. The facility shall maintain documented records and quantities for all finished product production lots to include the below information, as applicable:

o Facility GAA certification number
o Supplier name and address including country
o Species of fish, both scientific name and common or commercial name
o Product form at the time of landing including quantity and weight
o Date harvested/production date (process date or date code)
o FAO statistical area of harvest
o Country of first landing
o Country of origin
o Date landed
o Name of entity to which the fish was first landed or delivered including: name, telephone, and email address of contact person
o Name of the flag of the harvesting vessel
o Vessel permit or license number
o Unique vessel identifier (such as vessel name or registration number)
o Specific type of fishing gear used for harvesting
o Date of deliveries and lot numbers
o Input tonnage and total net weight produced for mass balance calculation
o Evidence of chain of custody from harvest to export to USA, where applicable
o Finished product forms (i.e. raw fresh, raw frozen, raw RTE, cooked, breaded, etc.)
o Line number and/or shift, if applicable
o Size grade
o Accurate labelling: for the above and all other required information - ingredients, handling instructions, facility address or registration number where applicable, amount, source, and other full identification information for raw material used (shrimp, tilapia, etc., delivered from what supplier and when)
o Amount and full identification information (see receiving) for any ingredients used (breading, marinades, batter, spices, etc.) for each lot of production
o Amount and full identification for any chemicals used (phosphates, sulphites) for each lot of product
o Amount and full identification for all packaging used for each lot of production

Explanation:
Facility BAP certification number - P10450
Lot number - 4H09 B.No.ACV-AP045679/002 - Dt. 2024-08-09
Production date (process date or date code) - Dt. 2024-08-09
Line number and/or shift, if applicable - 1 Line / A Shift
Species (common name and scientific name) - L.Vannamei
Size grade - 26/30 count per Lb
Country of origin - India
Product form - Raw Vannamei Peeled Deveined Tail on Vannamei Shrimp IQF
Unit of measure and total net weight for mass balance - 4,989.600 Kg's.
Accurate labelling: Shrimp, Salt & Sodium Phosphate, Allergen: Contains Shrimp
Amount and full identification information - Raw Shrimp - 7,483.000 Kg's
Amount and full identification for any chemicals used - N/A product is un treated.
Amount and full identification for all packaging used for each lot of production - M/s. Pragati Print Pack, Visakhapatnam (B.No.OB/PP/222), M/s.Coromandal Cartons Pvt. Ltd. (B. No.OB/MC/222D).

Pillar	Reference	Conforming
Traceability	9.4.1	Yes
Clause and Explanation		

Clause:
Products shall be packed in bags, boxes or master cartons, britestack pallets (i.e. canned) that are properly labeled with all information, including allergens, as required by local legislation and legislation of the country of destination.

Explanation:
Products are packed in pouches/duplex and master carton that are properly labeled with all information, including allergens as required by the local legislation and legislation of the country of destination.

Pillar	Reference	Conforming
Traceability	9.4.2	Yes
Clause and Explanation		

Clause:
Product labels shall also include all necessary information to ensure safe handling, storage, display, preparation and use of the product along the supply chain or by the consumer.

Explanation:
The product labeled include all necessary information to ensure safe handling, storage, display, preparation and use of the product along the supply chain or by the the consumer.

Pillar	Reference	Conforming
Traceability	9.5.1	Yes
Clause and Explanation		

Clause:
The facility shall keep an up-to-date list of all customer names and locations where they ship products to.

Explanation:
The facility have the list of customer names and locations documented in List of Buyers and Address(FMT/SOP/108A).

Pillar	Reference	Conforming
Traceability	9.5.2	Yes
Clause and Explanation		

Clause:
The facility shall maintain documented records for all production lots that records the below information, as applicable, for farm raised and for wild-caught species:
o Lot number
o Storage location
o Shipping - company, method, date
o Unique shipping identifiers - container or seal number, bill of landing
o Receiving customer information - name, address, invoice or order number
o Breakdown of all species, products, quantities, weight, sizes and lot numbers included in the shipment

Explanation:
All the information is captured and easily accessible, same is observed as part of traceability exercise of lot no. 4H09 B.No.ACV-AP045679/002 - Dt. 2024-08-09.
Lot numbers - 4H09 B.No.ACV-AP045679/002 - Dt. 2024-08-09.
Storage location - In house Cold Storage.
Shipping - CMA CGM, 22 Aug 2024.
Unique shipping identifiers - container No. CGMU554853-5.
Receiving customer information - M/s. Mark Foods LLC.
Breakdown - Raw Peeled Deveined Tail on Vannamei Shrimp IQF, 26/30 per Lb, 10X1 Lb. packs, 1500 M/c

Pillar	Reference	Conforming
Traceability	9.6.1	Yes
Clause and Explanation		

Clause:
The facility shall demonstrate that the traceability system is effective and that product identity preservation has been maintained through conducting and documenting mass balance per 9.6.2, below.

Explanation:
The facility is producing one aqua cultured species is SPF. Litopeneus vannamei and Penaeus monodon. A total of 2650 MT of Raw L. Vannamei Shrimps were processed to produce 1649.50 Metric tons of finished product and they achieved an yield of 62.25% and a total of 245 MT of Raw P. monodon shrimps were processed to produce 150 MT of finished product and they achieved an yield of 61.22%.

Pillar	Reference	Conforming
Traceability	9.6.2	Yes
Clause and Explanation		

Clause:
The facility shall document the total quantity of incoming raw material for each species and the total quantity of finished product produced per species and product form. The facility shall conduct a mass balance on this data based on the expected percentage processing yield by species and product form. The quantities and mass balance results shall be provided to the auditor for verification.
Results from the mass balance calculations shall clearly show that the quantity of inputs versus the outputs for each test are appropriate. Calculations shall also reflect what the expected recovery/yield percentage for each final product form is and how they were derived. (Annex 1, Glossary, for definition of Mass Balance).

Explanation:
The facility is producing one aqua cultured species is SPF. Litopeneus vannamei and Penaeus monodon. A total of 2650 MT of Raw L. Vannamei Shrimps were processed to produce 1649.50 Metric tons of finished product and they achieved

an yield of 62.25% and a total of 245 MT of Raw P. monodon shrimps were processed to produce 150 MT of finished product and they achieved an yield of 61.22%. As per the calculations in clause no's.9.6.1 & 9.6.2 quantity of inputs versus the outputs for each test are appropriate, and no mixing of BAP certified products with non-certified products occurred. Additional Mass Balance per lot code information from Trace exercises is also presented in An.3, 3.1.

Pillar	Reference	Conforming
Environmental	A2-1.1	Yes
Clause and Explanation		

Clause:
No Discharge into Natural Water Bodies: Facilities that do not discharge any effluents directly or indirectly into naturally occurring water bodies and comply with all other SPS requirements are eligible for GAA certification. (Examples: effluents used for irrigation or other purpose preventing discharge to naturally occurring water bodies. Where this is confirmed the requirements to sample and test effluents in Section 2 (below) do not apply.)

Explanation:
The consent of Authorization from the Andhra Pradesh Pollution Control Board is evident for operation of effluent treatment plant. Consent order No: 5041/APPCB/ZO-VSP/KKD/CFO/2020 Dt.2020-12-02 valid till 2030-12-31. Facility is eligible to discharge 20,000 Liters per Day of treated effluent including Domestic Effluent. Consent order stating that after treatment in the ETP, the treated waste water shall be used for green belt development within the industry's premises. Facility using their discharged water for agriculture crop for the land of 2 acres 48 cents present adjacent to the facility and same has been confirmed during facility inspection.

Pillar	Reference	Conforming
Environmental	A2-1.2	N/A
Clause and Explanation		

Clause:
Discharge to Municipal or Private Treatment Plants: Facilities that have a valid contract with a municipality or industrial park facility that assumes the responsibility to treat and dispose of effluents in compliance with government, regional and local regulations are eligible for GAA certification if all other GAA requirements are met. (Where this is confirmed the requirements to sample and test effluents in Section 2 (below) do not apply.)

Explanation:
Facility is not discharging to Municipal or Private Treatment Plants. Facility is using their effluent on land irrigation to the maximum extent possible within the industry's premises.

Pillar	Reference	Conforming
Environmental	A2-1.2.1	N/A
Clause and Explanation		

Clause:

Plants shall not exceed local or national government permitted load levels when discharging effluents to a municipal or industrial treatment facility.

Explanation:
Facility is not discharging to Municipal or Private Treatment Plants. Facility is using their effluent for on land for irrigation to the maximum extent possible within the industry's premises.

Pillar	Reference	Conforming
Environmental	A2-1.3	N/A
Clause and Explanation		

Clause:
On-Site Treatment: Facility treats its own effluents and discharges under a valid government permit into a naturally occurring water body (sea, river, estuary, etc.) and all GAA effluent parameters are met as described in Section 2 (below).

Explanation:
The consent of Authorization from the Andhra Pradesh Pollution Control Board is evident for operation of effluent treatment plant. Consent order No: 5041/APPCB/ZO-VSP/KKD/CFO/2020 Dt.2020-12-02 valid till 2030-12-31. Facility is eligible to discharge 20,000 Liters per Day of treated effluent including Domestic Effluent. Consent order stating that after treatment in the ETP, the treated waste water shall be used for green belt development within the industry's premises. Facility using their discharged water for agriculture crop for the land of 2 acres 48 cents present adjacent to the facility and same has been confirmed during facility inspection.

Pillar	Reference	Conforming
Environmental	A2-2.1	N/A
Clause and Explanation		

Clause:
For New Applicants: At least three consecutive months of effluent data, collected during operation, must be available for effluents that enter natural bodies of water (rivers, streams, canals, estuaries, etc.). Effluent samples shall be analyzed for all the variables listed in the Table in Section 2 (including 3 months' worth for the quarterly variables).

Explanation:
This is a re certification audit.

Pillar	Reference	Conforming
Environmental	A2-2.2	N/A
Clause and Explanation		

Clause:
For Recertification: Test results ongoing as noted in the table below.

Explanation:

The effluent water from the facility is used for on land irrigation and not entering into the natural water body.

Pillar	Reference	Conforming
Environmental	A2-2.3	N/A
Clause and Explanation		

Clause:
To minimize the chance of disease transmission from effluents discharged to natural waters, plants shall screen out solids and treat effluents by chlorination or another method of disinfection which will kill the disease organisms before release. (Once the effluents are properly treated, disinfectant residues shall be neutralized, removed, or allowed to dissipate prior to effluent discharge).

Explanation:
Refer to A2 2.2

Pillar	Reference	Conforming
Environmental	A2-2.4	N/A
Clause and Explanation		

Clause:
Records of effluent water quality concentrations entering natural bodies of water shall comply with government regulations, or the SPS criteria (See Table below), whichever is stricter.

Explanation:
Refer to A2 2.2

Pillar	Reference	Conforming
Environmental	A2-2.4.1	N/A
Clause and Explanation		

Clause:
* Mixing Zone Option for marine environments only:
Facilities that are unable to comply with the variable limits listed in Annex 2 Table 1, may elect an alternative approach to compliance by demonstrating that the water quality (as measured by the same set of variables) at the edge of the mixing zone (samples taken within a few meters downstream of the discharge pipe – closer or farther depending on the energy level of the receiving environment) and outside the mixing zone (samples taken upstream from the discharge pipe) does not differ. Sampling must be done on a quarterly basis.
For facilities that are unable to comply with the variable limits listed in Annex 2 Table 1, an assimilative capacity study on the receiving waters by a qualified third-party, updated annually,
would be an acceptable alternative to demonstrate compliance. The results of the assimilative capacity study shall show that there are no adverse effects on the receiving water bodies from the release of facility effluents.

Explanation:

Facility is not claiming any limited option.

Pillar	Reference	Conforming
Environmental	A2-2.5	N/A
Clause and Explanation

Clause and Explanation		

Clause:
The facility must record and provide to the auditor the annual average volume of effluent discharge in cubic meters/day. The auditor shall report this data to GAA for informational purposes only.

Explanation:
The facility discharging their effluent 20,000 cubic meter/day. Reviewed record ETP monthly statement (FMT/SOP/068D) Dt.2024-10-08.

Pillar	Reference	Conforming
Environmental	A2-2.5.1.A	N/A
Clause and Explanation		

Clause:
Please input annual average volume of effluent discharged in cubic meters/day for last calendar year.

Explanation:
20,000

Pillar	Reference	Conforming
Environmental	A2-2.5.1.B	N/A
Clause and Explanation		

Clause:
Please input the number of days the plant was in operation during the last calendar year.

Explanation:
365

Pillar	Reference	Conforming
Environmental	A2-2.6	N/A
Clause and Explanation		

Clause:
Collection of Effluent Samples during the Audit and Third-Party Laboratory Testing Instructions to Facilities and Auditors:
o The auditor shall supervise the collection of representative effluent samples during every GSA audit where Section 2 applies.
o Samples shall be taken by the facility, or the facility's designated third-party lab. The auditor is to supervise this process and verify that samples are taken from the correct locations and using accepted sample collection methods. Sampling may only be conducted during periods when processing and cleaning is occurring.
o Once the samples are collected, the auditor is to verify that they were properly marked with the sample number, date, time, facility name, sample location, and collection method (either grab or composite). Auditors must also ensure that the samples are sealed with tamper-proof tape and sent to, or picked up by, the third-party testing laboratory prior to completion of each audit.
o This obviously means that addressing effluent sampling shall not wait until the end of the audit. Nor be done after hours or on weekends when third-party labs are closed.
o Samples are to be tested for all parameters as described in Section 2. It is the facility's responsibility to ensure the third-party laboratory doing the testing is aware of and able to perform GSA required tests.
o Testing costs are the responsibility of the facility. Test results are to be forwarded for review, in a timely fashion, to the Certification Body responsible for conducting the audit.
o The third-party lab is to obtain the Certification Body's contact information and email address for directly forwarding the test results to them in a timely fashion.
The facility shall give permission for this to the third-party lab.

Explanation:
Refer to A2 2.2

Pillar	Reference	Conforming
Environmental	A2-2.6.1	N/A
Clause and Explanation		

Clause:
Where Annex 2 applies - were samples collected properly by the facility or third-party lab, from the correct locations and using accepted sample collection methods, marked and sealed properly and sent to or picked up by the third-party lab during the audit? (Auditor to note in comments who collected the sample)

Explanation:
Refer to A2 2.2

Pillar	Reference	Conforming
Environmental	A2-2.6.2	N/A
Clause and Explanation		

Clause:
Where Section 2 applies - the auditor shall describe the correct sample label details here for each sample: date, time, sampling location, and sample number.

Explanation:
Refer to A2 2.2

Pillar	Reference	Conforming
Environmental	A2-2.6.3	N/A
Clause and Explanation		

Clause:
The auditor shall also record how the sample was packaged, and the name of the third-party lab that picked it up, and where the sample was shipped. The auditor shall verify and record that samples were shipped immediately by the facility, the shipping method, and the name of the laboratory to which they were sent. (Informational purposes only).

Explanation:
Refer to A2 2.2

Pillar	Reference	Conforming
Traceability	A3-1.1	Yes
Clause and Explanation		

Clause:
The facility shall have a documented label control procedure to ensure integrity of BAP star category claims. The procedure shall include personnel authorized to approve, amend and release labels and its specifications and work instructions to control label use and their storage. The procedure shall also include the prevention of mislabelling of products of different BAP star categories for all applicable species.

Explanation:

The facility having a label control procedure documented in BAP Label Control Policy (Doc No.SOP/62 I07 R00 Dt.2024-06-01 page No.202). The procedure is addressing to ensure integrity of BAP star category claims and prevention of mislabeling of products of different BAP star categories for all applicable species.

Pillar	Reference	Conforming
Traceability	A3-1.2	Yes
Clause and Explanation		

Clause:
The label control procedure shall include a procedure for the proper labelling and downgrading of the star status of products in the event the facility mixes product of different BAP star categories. Where this occurs, records shall be maintained demonstrating which products of different BAP star categories were mixed, and that the star status of resultant product was properly downgraded. Examples:
· If 3-star BAP products are mixed with 2-star BAP products, then the entire product lot must be labelled as 2-star BAP product. The 3-star BAP products will lose its 3-star status.

Explanation:
The facility having a label control procedure documented in BAP Label Control Policy (Doc No.SOP/62 I07 R00 Dt.2024-06-01 page No.202). The procedure is addressing to ensure integrity of BAP star category claims and prevention of mislabeling of products of different BAP star categories for all applicable species. The procedure for the proper labeling and downgrading of the star status of products in the event the facility mixes product of different BAP star categories addressed in the Procedure for Usage of BAP Logo.

Pillar	Reference	Conforming
Traceability	A3-1.3	Yes
Clause and Explanation		

Clause:
The facility shall properly identify and label products of different BAP star categories whether or not BAP logo is used on packaging. Proper identification shall be maintained for each lot, for each star category, on all documents and at each step of the process flow from raw material receiving, handling, processing, packaging, storage and dispatch. Records shall be maintained to ensure integrity of BAP product claims and also demonstrate product of different BAP star categories are not mixed.

Explanation:
The facility having a label control procedure documented in BAP Label Control Policy (Doc No.SOP/62 I07 R00 Dt.2024-06-01 page No.202). The procedure is addressing to ensure integrity of BAP star category claims and prevention of mislabeling of product of different BAP star categories for all applicable species. The facility verifying the labels during the product documented in Checklist for label verification (FMT/SOP/090) Dt.2024-08-10 and this record include the details of BAP star categories.

Pillar	Reference	Conforming
Traceability	A3-2.1	Yes

Clause and Explanation

Clause:
The facility shall assign a unique code or lot number separately for products of each BAP star category. This unique code or lot number shall be assigned at receiving and carry forward through each step of production, packaging and storage in order to easily identify and trace every lot of BAP 1, 2, 3 and 4-star products from each other, and from non-BAP products.

Explanation:
Traceability was documented in Procedure for Traceability (Doc No. SOP/40 I06 R00 Dt.2024-06-01 page No.117). were developed to address product identification and Traceability through out the process. Batch codes and quantities used were clearly recorded on all in process records as observed during site tour during the audit, like batch no's. Traceability (FMT/SOP/QC/89A) used for recording all the quantities and batch no's. of ingredients, packing material and shrimps used in the production. Facility out sourced the services like pest control, transportation, waste collection etc., which are mostly PRP's and they can track these services by using records. No products or ingredients were outsourced.

Pillar	Reference	Conforming
Traceability	A3-2.2	Yes
Clause and Explanation		

Clause:
Product shall not be claimed as BAP 2, 3 or 4-star unless the unique code or lot number stated in A3-2.1 appears on all production documents from receiving throughout to shipping. Or, where product is assigned a different code or number at some stage, the unique code or lot number referenced in A3-2.1 shall also be referenced in the production document(s) together with the new code. These documents shall also bear the BAP certification number of the farm(s), hatchery/nursery and/or feed mill the product was sourced from, and the quantity per lot for each BAP star category.

Explanation:
The procedure for Traceability documented in Procedure for Traceability (Doc No. SOP/40 I06 R00 Dt.2024-06-01 page No.117) addressing to ensure integrity of BAP star category claims and prevention of mislabeling of products of different BAP star categories for all applicable species. The procedure for the proper labeling and downgrading of the star status of products in the event the facility mixes product of different BAP star categories addressed in the Procedure.

Pillar	Reference	Conforming
Traceability	A3-2.3	Yes
Clause and Explanation		

Clause:
Finished product codes and/or lot numbers that appear on the master carton and inner packaging shall either match the unique codes referenced in A3-2.1, or, there shall be a reference back to those unique codes in finished product documents so that the packaging codes and the unique codes in A3-2.1 are tied to each other.

Explanation:
The finished product codes were compared in case of traceability exercise's conducted during the audit for BAP Star Products 1 trace forward and 3 trace back exercises on Product code 4H09 B.No.ACV-AP045679/002 (Trace forward), 4G27 B.No.ADF-AP050252/003 (Trace back), 4F25 B.No.RRV-AP031888/013 (Trace back), 4E28 B.No.SKS-AP026322/0013 (Trace back) and codes on labels and finished product records were matching.

Pillar	Reference	Conforming
Traceability	A3-2.4	Yes
Clause and Explanation		

Clause:
The codes and lot numbers referenced in A3-2.1 to A3-2.2 shall also be transferred to shipping documents that are provided directly to the purchaser/buyer. The facility shall provide to the auditor the document being used for this purpose and the auditor shall record this information on the audit report.

Explanation:
The shipping documents provided to the buyer for the following order number 1 trace forward and 3 trace back exercises on Product code 4H09 B.No.ACV-AP045679/002 (Trace forward), 4G27 B.No.ADF-AP050252/003 (Trace back), 4F25 B.No.RRV-AP031888/013 (Trace back), 4E28 B.No.SKS-AP026322/0013 (Trace back). The lot numbers were mentioned in shipping documents.

Pillar	Reference	Conforming
Traceability	A3-2.5	Yes
Clause and Explanation		

Clause:
For each shipment, the documents referenced in A3-2.4 shall also record the breakdown of quantities for each BAP star category and its unique code or lot number.

Explanation:
All shipment documents provided with the break down of quantities for each BAP approved species with unique lot numbers.

Pillar	Reference	Conforming
Traceability	A3-2.6	Yes
Clause and Explanation		

Clause:
The facility must record and provide to the auditor evidence of a documented relationship with all BAP facilities to which the facility is linked for purposes of star status claims, including the names of all supplying facilities, names of all receiving facilities, and the corresponding annual volume of BAP product exchanged between the named BAP facilities in metric tons/year.

Explanation:
The facility maintaining electronic traceability system includes the annual raw material received, names of all supplying facilities, names of all receiving facilities, and the corresponding annual volume of BAP product exchanged between the named BAP facilities in metric tons/year.

Pillar	Reference	Conforming
Traceability	A3-2.7	Yes
Clause and Explanation		

Clause:
Where the facility is eligible to produce BAP 2-star product(s), the facility shall keep an up-to-date list of all of the BAP-certified farms that are supplying them since the last BAP audit. This information shall also include the quantity by species actually supplied by each farm, the productive capacity of each farm, and the BAP facility certification number for each farm.

Explanation:
Effective Label Control was described in BAP Label Control Policy (Doc No.SOP/62 I07 R00 Dt.2024-06-01 page No.202) addressing to ensure integrity of BAP star category claims and prevention of mislabeling of products of different BAP star categories for all applicable species. The procedure for the proper labeling and downgrading of the star status of products in the event the facility mixes product of different BAP star categories addressed in the Procedure.. Product identification, material tracking, and label control have been properly designed and implemented. Auditor verified Finished Products in-process and in cold storage freezers were properly packaged and labeled including lot identification.

Pillar	Reference	Conforming
Traceability	A3-2.8	Yes
Clause and Explanation		

Clause:
Where the facility is eligible to produce BAP 3 and/or 4-star, the facility shall keep an up-to-date list of the BAP certified farms that are supplying them since the last BAP audit.

Explanation:
Facility eligible to produce to produce Four Star Product undergoing BAP Re certification of Processing Plant. Effective Label Control was described in BAP Label Control Policy (Doc No.SOP/62 I07 R00 Dt.2024-06-01 page No.202). Product identification, material tracking, and label control have been properly designed and implemented. Auditor verified Finished Products in-process and in cold storage freezers were properly packaged and labeled including lot identification.

Pillar	Reference	Conforming
Traceability	A3-2.9	Yes
Clause and Explanation		

Clause:
In addition, facilities producing 3-star product shall require supplying farms to provide documentation verifying of their BAP 3-star eligible lots. Likewise, facilities producing 4-star product shall require supplying farms to provide documentation verifying of their BAP 4-star eligible lots.

Explanation:
The facility produced only 2 & 3 star product for the last calendar year 2023. The traceability exercise for 2 & 4 Star product has been reviewed and documentation available for their BAP 2 & 4 star eligible lots.

Pillar	Reference	Conforming
Traceability	A3-2.10	Yes
Clause and Explanation		

Clause:
The facility shall also conduct mass balance tests on a per lot basis for each star category per species and product form. Per lot mass balance verification data shall be provided to the auditor for verification.

Explanation:
Facility conducted mass balance per each star category for each species and the details were presented to auditor in the form of spread sheet. Reviewed mass balance test conducted by the facility for
Trace Forward: 4H09 B.No.ACV-AP045679/002, Raw Material 7,483.000 Kg, Finished Product 2,984.640 Kgs , % Process Yield = 66.67%. Trace Back: 4G27 B.No.ADF-AP050252/003, Raw Material 3,522.000 Kg, Finished Product 2,258.928 Kgs , % Process Yield = 64.13%. Trace Back: 4F25 B.No.RRV-AP031888/013, Raw Material 5,038.000 Kg, Finished Product 3,243.240 Kgs , % Process Yield = 64.37%. Trace Back: 4E28 B.No.SKS-AP026322/0013, Raw Material 10,450.000 Kg, Finished Product 6,804.000 Kgs , % Process Yield = 65.11%

Pillar	Reference	Conforming
Traceability	A3-2.11	Yes
Clause and Explanation		

Clause:
Results from A3 2.10 and 9.6.2 shall clearly show that the quantity of inputs versus the outputs for each test are appropriate, and that no mixing of BAP-certified products with non-certified products and no mixing of wild-caught with BAP eligible species occurred. (If the facility mixes product of different BAP star categories together in a lot, this situation shall be handled as described under A3 1.2). Calculations shall also reflect what the expected recovery/yield percentage for each final product form is and how they were derived. (See Appendix 1, Glossary, for definition of Mass Balance).

Explanation:
As per the calculations in clause no A3, 3.1 quantity of inputs versus the outputs for each test are appropriate, and no mixing of BAP certified products with non-certified products occurred. Additional Mass Balance per lot code information from Trace exercises is also presented in A3 3.1.

Pillar	Reference	Conforming
Traceability	A3-2.12	Yes
Clause and Explanation		

Clause:
The facility shall provide the auditor a summary of the quantities for each BAP-certified species, broken down into their respective Star Status categories and this data shall be included in the audit report.

Explanation:

The facility provided summary of quantities for each BAP certified farm for the year 2023 with the respective star status categories for SPF. Litopeneus vannamei and Penaeus monodon. A total of 2650 MT of Raw L. Vannamei Shrimps were processed to produce 1649.50 Metric tons of finished product and they achieved an yield of 62.25% and a total of 245 MT of Raw P. monodon shrimps were processed to produce 150 MT of finished product and they achieved an yield of 61.22%.

Pillar	Reference	Conforming
Traceability	A3-3.1	Yes
Clause and Explanation		

Clause:
The results of the trace-forward and trace back exercises shall be recorded for each star category the facility is authorized to produce. 100% accountability shall be achieved during the exercises.

Explanation:
Trace Back Exercise: Production Code (2Star): 4F25 B.No.RRV-AP031888/013 – Produced on 25th June 2024. Raw Vannamei Peeled Deveined Tail on Vannamei Shrimp IQF, 21/25 - 715 cases (4X2.5 Lbs.), Raw material supplied by Rao Venkata Rama Chinna Rao, Ramanakkapeta, Farm Reg No. AP031888/013 (F10625B), feed used in the farm received from Devi Aqua Feeds (M10179), RM – 5,038.000 Kgs., HL- 3,527.000 Kgs., Pre-Soak Weight – 3,033.000 Kgs after soaking – 3,263.000 Kgs, each bag is 1.134 Kg. and 4 pack per case, 715 cases, Total – 3,243.240 kgs, waste generated in process 2,050.100 Kgs and a yield 64.37% is achieved and this yield is matching the theoretical loss. The packaging material used master cartons used 715 B. No. SC/MC/218 received from M/s. Coromandel Cartons, Visakhapatnam, Pouch used 2,860 B. No. PC/PP/177 received from M/s. Pragati Print Pack Pvt. Ltd. The ingredients used are Phosphate B. No. 23106166 Qty. used 61.000 Kgs received from Prayon S.A, Belgium, Salt B. No. CL/06 Qty. used 61.000 Kgs received from, Ponkani Traders, Vijayawada.
Trace Back Exercise: Production Code (2Star): 4E28 B.No.SKS-AP026322/0013 – Produced on 28th May 2024. Raw Vannamei Peeled Deveined Tail off Vannamei Shrimp IQF, 36/40 - 375 cases (8X5 Lbs.), Raw material supplied by Kucharlapati Suryanarayana Raju, Farm Reg No. AP026322/0013 (F12342), feed used in the farm received from Devi Aqua Feeds (M10179), RM – 10,450.000 Kgs., HL- 7,304.000 Kgs., Pre-Soak Weight – 5,990.000 Kgs after soaking – 6,828.000 Kgs, each bag is 2.268 Kg. and 8 pack per case, 375 cases, Total – 6,804.000 kgs, waste generated in process 4,460.100 Kgs and a yield 65.11% is achieved and this yield is matching the theoretical loss. The packaging material used master cartons used 375 B. No. SC/MC/149 received from M/s. Coromandel Cartons, Visakhapatnam, Pouch used 3,000 B. No. SC/PP/149 received from M/s. Pragati Print Pack Pvt. Ltd. The ingredients used are Phosphate B. No. 23106166 Qty. used 80.000 Kgs received from Prayon S.A, Belgium, Salt B. No. CL/05 Qty. used 120.000 Kgs received from, Ponkani Traders, Vijayawada.

Pillar	Reference	Conforming
Food Safety	A4-1.1	N/A
Clause and Explanation		

Clause:
Auditors shall provide a narrative description of the process used to select samples, and any difficulties encountered in assembling the requisite number of samples.

Explanation:
A total of 08 samples for Litopenaeus vannamei and 04 samples for Penaeus monodon of two product forms were drawn for micro and chemical analysis as per BAP Annex - 4 Table II and details are as follows. The samples drawn for raw products.

Pillar	Reference	Conforming
Food Safety	A4-1.2	N/A
Clause and Explanation		

Clause:
Auditors must supply documentation associated with the samples collected, to include: · A copy of the plant inventory sheet in use on the day samples are collected, against which the selection of samples was made (supply as an Excel or Word file, or as a legible scanned file or photo)
*List of samples collected, facility and laboratory details (as an Excel file), detailing the following:
*Facility name and GSA ID number
*Third-party laboratory name and contact details
*Sampling date and times
*Species (scientific name)

*Primary Product Form description (per sample)
*Alphanumeric Sample Code assigned by auditor - as written on sample bags (per sample)
*Production lot ID or date code (per sample)
*Description of product, including product specifications such as size or count, supplier code, etc. (per sample)
*Photos of each sample collected, showing the assigned alphanumeric code and any other tracking information visible on the bag (per sample)
*A description of how the samples were packed and shipped shall be provided to GSA.
Once testing has been completed, the laboratory must forward an original copy of the analytical results directly to the CB and GSA, with a copy to the facility. Results must be documented in the certification records, and CB's must supply GSA with copies of the test results.
If any positive results are detected in a composited sample, laboratories will be required to utilize the retained portions of individual samples to
determine which production lot(s) were the cause of the positive results. Facilities shall launch an investigation into the root cause of such contamination,
and document effective corrective actions to prevent future recurrences. Positive test results will normally result in GSA assigning a more frequent level of
"Plant Ongoing Monitoring", as is subsequently described in Section 3 of Annex 4.

Explanation:
A total of 08 samples for Litopenaeus vannamei and 04 samples for Penaeus monodon of two product forms were drawn for micro and chemical analysis as per BAP Annex - 4 Table II
and details are as follows. The samples drawn for raw product and cooked product at the time of audit.

The auditor shall confirm whether the tests carried out by the Third-party Laboratory were complete, that the correct parameters were tested, using testing methods acceptable to GSA, and using the correct levels of sensitivity (LOQ's, MRPL's), as specified in Annex 4 Tables II, III, or IV, as applicable.

Explanation:
The tests carried out by third party lab the correct parameters were tested, using testing methods acceptable to GAA, and using the correct levels of sensitivity (LOQ's, MRPL's). The reports available for review are Chemical Test Report No.QFD24090451-01 Dt.2024-09-18, QFD24030351-01 Dt.2024-03-16 (Raw product).

Pillar	Reference	Conforming
Food Safety	A4-3.3	Yes
Clause and Explanation		

Clause:
The auditor shall confirm whether the results from the tests on samples collected during the audit conform to the GAA limits stated in Annex 4 Tables II, III, or IV, as applicable.

Explanation:
The tests carried out by third party lab SMS Labs Services Private Limited, Chennai, the correct parameters were tested, using testing methods acceptable to GAA, and using the correct levels of sensitivity (LOQ's, MRPL's). The results confirm that the GAA limits stated in Annex 4 Tables II, III, or IV.

Pillar	Reference	Conforming
Food Safety	A4-3.4	No - Minor
Clause and Explanation		

Clause:
Were the results of "Plant Ongoing Monitoring" communicated to the CB and to the GAA as required?

Explanation:
The facility communicated the ongoing monitoring results to the CB & GAA via email on March 30, 2024. However, the last test report, dated September 18, 2024, was not shared with CB & GAA.

Pillar	Reference	Conforming
Food Safety	A4-3.5	N/A
Clause and Explanation		

Clause:
What is the frequency of "Plant Ongoing Monitoring" the facility is using at the time of the audit? Does the frequency of such testing conform to what is expected for the facility under the requirements of Annex 4 Table I?

Explanation:
The facility is not under Accelerated Sampling.

Pillar	Reference	Conforming
Food Safety	A4-3.6	N/A

Clause and Explanation

Clause:
Did the Facility arrange for a Third-party Laboratory accredited to ISO 17025 or equivalent, or a Sampling Company recognized by GAA to collect samples as required?

Explanation:
The facility is not under Accelerated Sampling.

Pillar	Reference	Conforming
Food Safety	A4-3.7	N/A
Clause and Explanation		

Clause:
The auditor shall confirm whether the tests carried out by the Third-party Laboratory were complete, that the correct parameters were tested, using testing methods acceptable to GSA, and using the correct levels of sensitivity (LOQ's, MRPL's), as specified in Annex 4 Tables II, III, or IV, as applicable.

Explanation:
The facility is not under Accelerated Sampling.

Pillar	Reference	Conforming
Food Safety	A4-3.8	N/A
Clause and Explanation		

Clause:
The auditor shall confirm whether the results from the tests on samples collected during the audit conform to the GAA limits stated in Annex 4 Tables II, III, or IV, as applicable.

Explanation:
The facility is not under Accelerated Sampling.

Pillar	Reference	Conforming
Food Safety	A4-3.9	N/A
Clause and Explanation		

Clause:
Were the results of "Plant Ongoing Monitoring" communicated to the CB and to the GAA as required?

Explanation:
The facility is not under Accelerated Sampling.
